[PETERLYNN.COM](http://PETERLYNN.COM)

“We believe we can make kitesports accessible and enjoyable for everyone”

#### About us

Welcome to the world of Peter Lynn. A wind driven world where our passion for kite sports fuels our desire to deliver the best kites for any kiting discipline.

We believe that we can make the kite sport accessible and enjoyable for everyone, by making our products user friendly and easy to use. Peter Lynn kites are stable, give the user an instant feeling of comfort and safety and at the same time they inspire progression.

From kiteboarding to powerkiting and everything in between, we do it all. It is in this spirit that we offer such a complete and uniquely wide variety of high quality kites and related products that suit all ages, any skill level and all passions.

We at Peter Lynn are kiteflyers at heart, and have been for over four decades. This makes us one of the oldest and most trusted kite brands in the world.

#### Kite-design redefined

At Peter Lynn we take pride in our strong Dutch belief in honest, uncompromised and no-nonsense products. A belief that drives us to always use the best possible materials and innovative construction methods, in order to deliver only products that meet the highest quality standards in every aspect.

Peter Lynn kites are only released when we feel that they offer a

significant improvement over previous models. We refrain from launching new products each year that do not express our vision of innovative and cutting edge kite design.

Our kites are thoroughly tested on different surfaces and under a variety of circumstances all over the world. They are scrutinized, in every aspect, under the most demanding conditions, by the most demanding riders.

Whether you are just getting started, shredding waves, whether you're ripping up the dirt or carving fresh powder... Peter Lynn provides you with capable and reliable tools to have fun with, progress fast and get the most out of your kiting sessions, every session!

# INSPIRING AND ADVENTUROUS

Be different. Take risks. We explore new paths to make kite sports accessible.

# THE RIGHT PRODUCT

Premium gear, for when the game is on!  
One brand, all disciplines.

Perfect versatile all-round kite  
for any level

Fast and direct turning

Intuitive handling and kite feedback

Controllable lift and boost

Progressive power development

Great performance,  
huge windrange

# ESCAPE

4-Struts // All-round – Freeride // Navigator SL control bar

5m<sup>2</sup> 7m<sup>2</sup> 9m<sup>2</sup> 11m<sup>2</sup> 13m<sup>2</sup>

“The Escape is one of the most comfortable and intuitive performance kites out there. Its stable and durable 4-strut design offers multiple trim options for customized handling and a broad performance range. Its balanced medium aspect ratio offers endless versatility at any level, and its quick and direct turning is guaranteed to keep you stoked.”

The Escape’s balanced 4-strut setup gives the kite a clean middle section which delivers a ton of raw power. Its squared off wingtips make for quick turning and efficient use of the wind throughout the entire wind window.

“We believe that every kite session should be enjoyable and inspire you to progress and boost your confidence as a rider. To that end we have designed a kite that allows you to escape your limitations and gives you the freedom to enjoy every aspect of kiteboarding comfortably and full of confidence.”

- Perfect wave / cross over kite
- A kite that excels in all conditions
- Rock solid stability
- Unrivalled line drift
- Fast and direct turning
- Lively and responsive even when depowered
- Exceptional windrange
- Quick and easy relaunch

# SWELL

**3-Struts // Wave - Cross-over // Navigator SL control bar**

**5m<sup>2</sup> 6m<sup>2</sup> 7m<sup>2</sup> 8m<sup>2</sup> 9m<sup>2</sup> 10,5m<sup>2</sup> 12m<sup>2</sup>**

A versatile 3-strut SLE kite that combines wave riding freestyle and freeriding performance in one perfect package. The Swell is designed to give you the responsiveness and maneuverability of a wave/wake style kite and combines it with smooth drift and great stability that allows you to focus on surfing the wave.

The shape of the Swell gives the kite amazing low-end power and high-end range that is so far unseen in any other wave kite on the market.

Its unique, more driven, shape gives it more range and allows it to be flown at a higher angle of attack (powered up) without backstalling. The well-balanced 3 strut design of the Swell allows the kite to drift well, even in those not so perfect conditions where other wave kites tend to limit your performance.

*“The Swell excels in all conditions, good or bad. We threw out the rulebook to make a kite that is not plagued by the usual problems that wave kites have, such as lack of low end power and upwind drive.”*

- Great handling and kite feedback
- Quick, smooth and direct turning
- Progressive power development
- Fast flying speed, even when depowered
- Maximum boost, lift & float
- Superb upwind performance
- Massive hangtime

# FURY

5-Struts // Big air – Hangtime – Lightwind –  
Race/Foilboard // Navigator SL control bar

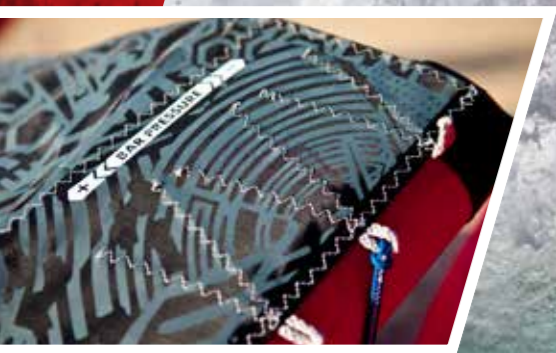

6m<sup>2</sup> 7m<sup>2</sup> 9m<sup>2</sup> 11m<sup>2</sup> 13m<sup>2</sup> 15m<sup>2</sup> 17m<sup>2</sup> 19m<sup>2</sup>

The Fury is the dream kite for anyone who wants to go fast, go big and stay up in the air for a long time. The 5 Strut Fury combines a high aspect ratio and high performance profiles to give you huge lift and awesome hangtime. The five point cascading fixed bridle gives the kite fast and direct handling and a very progressive power/depower and makes sure that every landing is butter soft und controlled.

The Fury is tuned to give you control and stability even when the bar is fully pushed out, so at no time will you feel disconnected and out of control, no matter how hard the wind is blasting your kite. We wanted to make sure the kite would work both in its low end and high end without any compromises in safety and performance.

The Fury's high performance is not only great for hangtime and jumps. A high "Lift to Drag" ratio also means that this kite is very efficient and has no problems performing around on the racecourse.

*"We wanted a kite that would rival the hangtime of high performance foil kites while still keeping the safe handling and relaunch of an LEI. Working closely with some of the best Airstyle Riders, Formula Racers and Foilboarders we made an amazing kite that will make any performance rider happy."*

# LEI KITE FEATURES

**REINFORCED CLOSING SEAM**  
For added strength and rigidity

**EXTREMELY TOUGH BRIDLE CONNECTIONS**  
For a reliable and safe connection

**NEW LE DACRON LAYOUT**  
For added strength and rigidity

**ONE BIG EFFICIENT INFLATE & DEFLATE VALVE**  
Fast and hassle free

**ONE PUMP SYSTEM**  
Fast and hassle free

**RONSTAN SHOCK BLOCK PULLEYS**  
A reliable and safe connection

**RIGID X SHAPED PANEL LAYOUT**  
For balanced weight distribution

**EFFICIENT AND DURABLE LIGHTWEIGHT WINGTIPS**  
Dacron reinforced wingtips for maximum longevity

**3 SETUP - TRIMMING OPTIONS**  
Easily adjust your bar pressure to your preferred style of riding

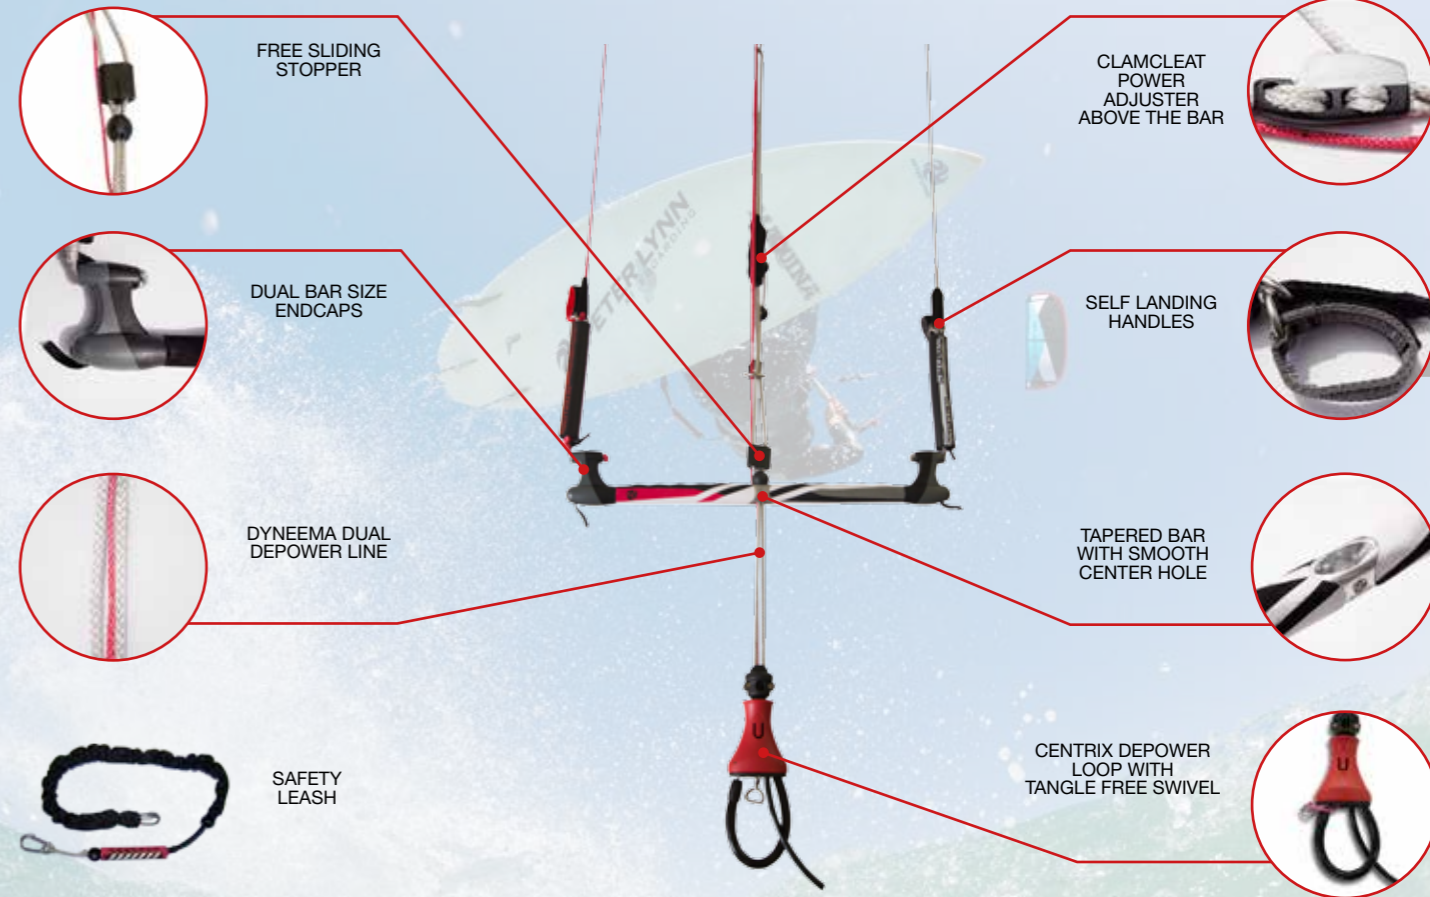

The Navigator bar has a unique design combining safety and user-friendliness. The complete Navigator bar is designed to be as simple as possible without making any compromise in safety, user comfort or the possibility of tuning your bar to your personal preference. Whether you're kiteboarding, landboarding or snowkiting the Navigator is your safe connection to a world of power.

Peter Lynn offers the Navigator bar in two different setups. One for the Twinskin kites and one for the LEI kites. The main difference between

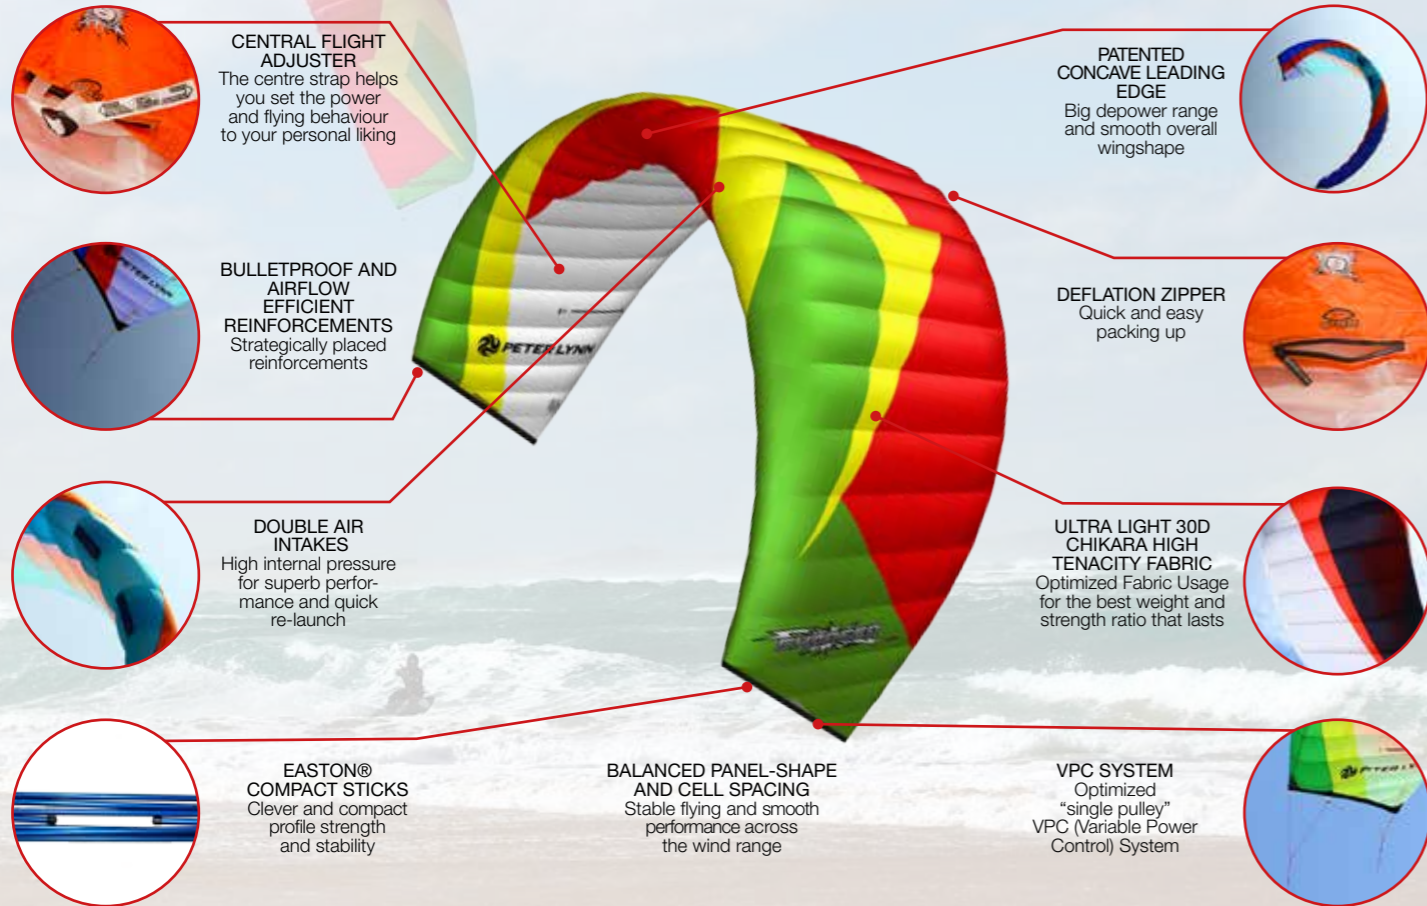

these two is the safety. Twinskins flag out to one top line whereas LEI kites flag out on both top lines. The Navigator TS bar comes with the setup for Twinskin kites and the Navigator SL comes with the LEI setup. Both Navigator bars are easily adjusted to personal preferences. To easily see the difference, the graphics on the floaters are different.

By making use of the line extension set and the dual bar size end-caps the bar can be adjusted to handle both smaller and larger kites.

# NAVIGATOR BAR

# TWINSKIN KITE FEATURES

# CHARGER

- Unbeatable stability and auto-zenith
- Highly adaptable
- Great low end power and large wind range
- Easy water relaunch
- Smooth flying & fast turning
- Clean airflow
- Large amount of pop

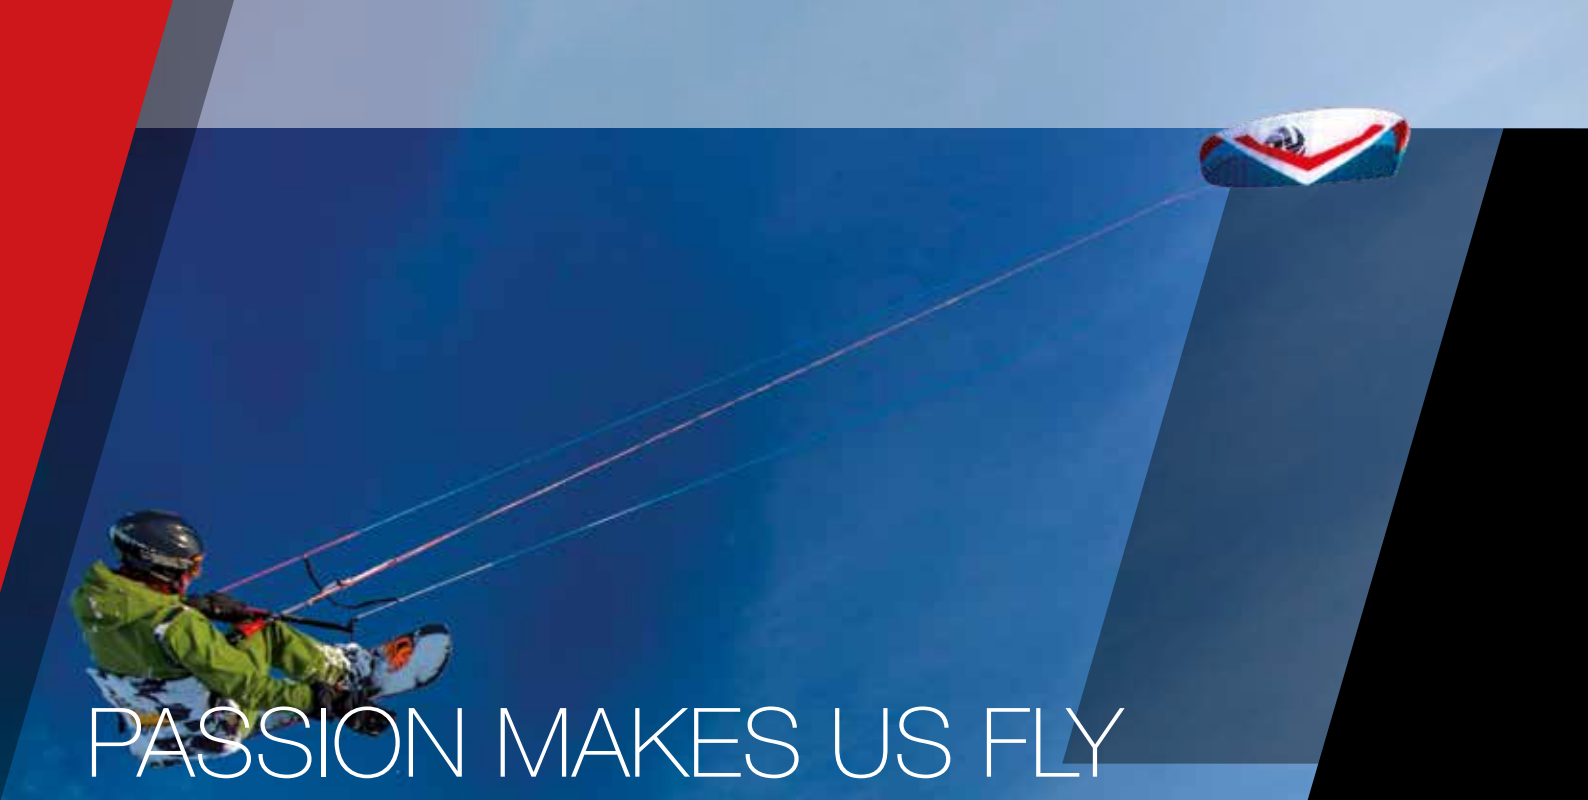

Twinskin technology // Freestyle - All terrain

6,5m<sup>2</sup> 8m<sup>2</sup> 10m<sup>2</sup> 12m<sup>2</sup> 15m<sup>2</sup> 18m<sup>2</sup> 22,5m<sup>2</sup>

The Charger has proven to be more stable, durable, adaptable and more capable of serving you excellent kiting performance. One of the best things about kiting is going big! The profile of the Charger gives amazing lift for extremely high jumps. The Charger will surprise you with its outstanding stability, and relaxing auto-zenith and its smooth but direct steering.

“A Peter Lynn Twinskin is the most stable kite for all conditions, the Charger has that typical and magical Twinskin feeling.”

Freestyle kite with crazy lift and hangtime for experienced riders

High turning and flying speed

Large depower range

Great upwind performance

Superb stability and balanced bar pressure

# LEOPARD

Open cell depower foil // Freestyle - Hangtime // 7m<sup>2</sup> 9m<sup>2</sup> 11m<sup>2</sup> 13.5m<sup>2</sup>

The Leopard is an exceptional combination of powerful performance and safe snowkiting. This 5-line, high aspect-ratio, open-cell depower kite is designed for high performance snowkiting and for experienced snowkiters that break down boundaries for breakfast.

The excellent turning speed provides you with the initial boost to get going and makes it easy to work and/or loop the kite to keep you going even in light winds. A large wind range, solid low end power, high turning speed and massive lift & hangtime are some of the key characteristics the Leopard brings to the table.

*“We believe that snowkiting for experienced and dedicated riders starts with a kite that you can rely on and puts you in full control. It must be stable, deliver tons of performance and lift like crazy. And above all it must be simple to enable you to go big and have more airtime to tweak your tricks to perfection. To that end we have designed a kite that allows you to shape your own style and gives you the freedom to push your kiting to the limit.”*

Predictable and quick turning

Superb stability

Agile but easy to control

Versatile and user friendly

Smooth power build up and acceleration

Big usable wind range

# LYNX

Open cell depower foil // Freeride /

Backcountry snow kite // 5m<sup>2</sup> 7m<sup>2</sup> 9m<sup>2</sup> 11m<sup>2</sup>

The Peter Lynn Lynx depower foil is your ticket to endless fresh powder snowkite sessions and unlimited backcountry adventures. Its forgiving nature and ease of use make it the perfect snowkite for riders of all skill levels. Starters will appreciate the kite's smooth and constant power delivery and superb stability. Intermediate riders will enjoy its acceleration and snappy control and even advanced riders will be surprised at its performance in the more challenging conditions.

The Lynx is a medium aspect-ratio, open cell depower foil with a 5th line safety that makes backcountry exploring fun and easy with its user friendliness and versatility. The kite has a very predictable and smooth power delivery and it offers great turning speed to allow for quick redirects or to get going even in light winds. Its superb stability and controllable power build-up make the Lynx a great kite for those starting out while its acceleration and snappy controls allow for the confidence to make quick progression. And its performance in higher winds will put a smile on the face of even the most experienced riders.

*“With the Lynx we wanted to design a kite which enables riders to enjoy freeride snowkiting to the fullest. We feel that a freeride open-cell depower foil has to be accessible and offer reliable performance in a wide variety of conditions. It has to offer quick and responsive control without sacrificing the stability you need to enjoy endless fresh powder sessions comfortably and in full control.”*

# MAGNET BAR FEATURES

**KOOK-PROOF LINE CONNECTIONS**

**FREE SPINNING DEPOWERLOOP**

**RELAUNCH SELF LANDING HANDLE**

**CLAMCLEAT® POWER ADJUSTER**

**SMOOTH CENTER HOLE**

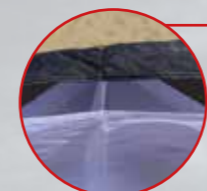

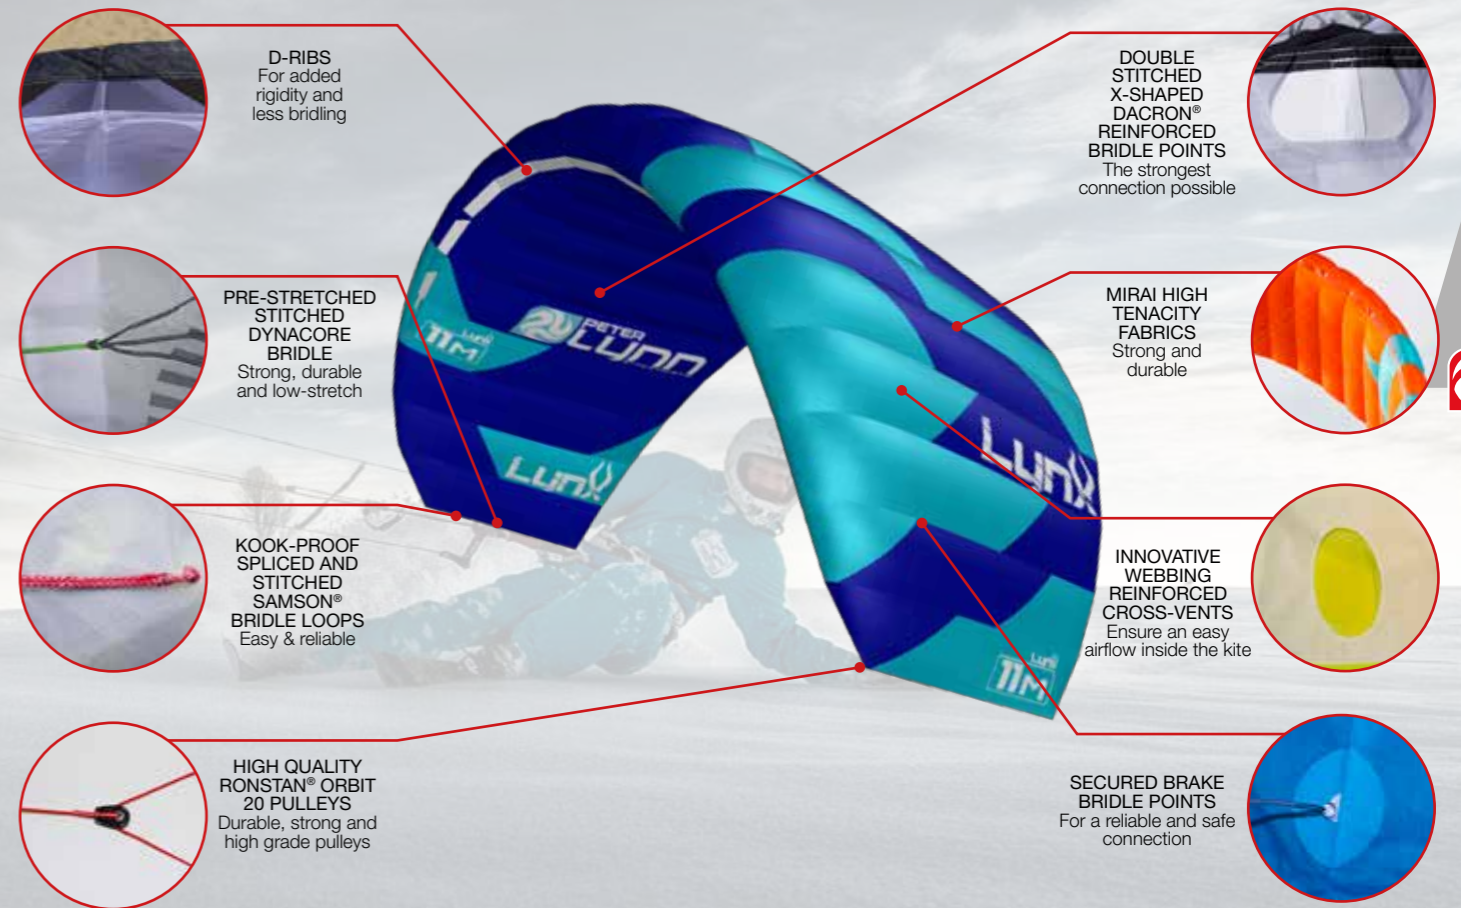

**CLUTTER-FREE SAFETY LINE ATTACHMENT**

Open cell depower kites are equipped with the Peter Lynn Magnet control system (complete kites only) which is optimized for use in snow, while not compromising its suitability and ease of use for any other kite activity. Based upon the proven Navigator bar, this system ensures functionality and safety at the highest level of performance.

The tapered bar is fitted with extra grippy, colour-coded E.V.A. foam which makes it easy to hold on to, with or without gloves.

# DEPOWER KITE FEATURES

**D-RIBS**  
For added rigidity and less bridling

**PRE-STRETCHED STITCHED DYNACORE BRIDLE**  
Strong, durable and low-stretch

**KOOK-PROOF SPLICED AND STITCHED SAMSON® BRIDLE LOOPS**  
Easy & reliable

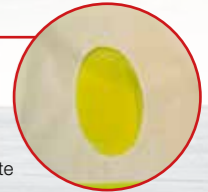

**HIGH QUALITY RONSTAN® ORBIT 20 PULLEYS**  
Durable, strong and high grade pulleys

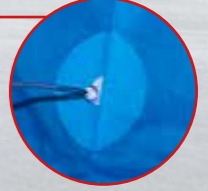

**DOUBLE STITCHED X-SHAPED DACRON® REINFORCED BRIDLE POINTS**  
The strongest connection possible

**MIRAI HIGH TENACITY FABRICS**  
Strong and durable

**INNOVATIVE WEBBING REINFORCED CROSS-VENTS**  
Ensure an easy airflow inside the kite

**SECURED BRAKE BRIDLE POINTS**  
For a reliable and safe connection

# DESIGNER NOTES

At Peter Lynn we continuously strive to come up with new and innovative ideas to make kiting more accessible and enjoyable than ever before. With this goal Peter Lynn himself and Michel Dekker (foilkite designer at Peter Lynn Kitesports) set the challenge amongst themselves during early 2013 to design the most game changing power kites to date. Requirements were; lightwind performance, practically indestructible, easy to fly, safe to use, and above all, it had to be simple to produce, to keep it affordable. In short: a kite as bombproof as the NPW kites from back in the day, yet with the comfortable and efficient flight characteristics of modern fixed bridle foils.

The obvious solution to making a foilkite bombproof is to eliminate the weak spots. Conventional foilkites can burst upon heavy impacts because the air inside the kite can not escape. So it

was quickly recognized that the bottom skin had to go, creating a single skin kite. To get the single skin design to the point where we were confident about every aspect, we needed the kites to be stable and reliable without the addition of complex bridle systems.

In September 2014 late stage prototypes were put through a rigorous test of functionality and durability; a 2600Km kitebuggy expedition through Mongolia, where the single skins proved their excellence in handling, ease of use, ultra light wind performance and compact and lightweight packing.

After two years of development and finetuning, we now proudly present the Uniq series; three uniquely different single skin kites that all offer a kiting experience unlike anything to date.

## UNIQU PLAY

2-line Single skin with straps

Fun - Entry

1.5m 2.0m 2.5m

The easiest way to get into powerkiting. A simple 2-line set up that has all the characteristics of a more serious power-kite in a small yet powerful package for the whole family.

## UNIQU TR

3-line Single skin with bar

Fun - Entry - Trainer

1.5m<sup>2</sup> 2.5m<sup>2</sup>

An easy going 3-line setup controlled by a bar and equipped with a 3rd safety/relaunch line for the more ambitious flyer.

## UNIQU QUAD

4-line Single skin with handles

All-round

1.5m<sup>2</sup> 2.5m<sup>2</sup> 3.5m<sup>2</sup> 4.5m<sup>2</sup>

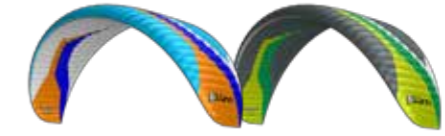

A highly efficient and powerful 4-line kite for more experienced flyers and starters alike who are looking for a challenge. Its lightweight and compact packing size make it the ideal solution for kite expeditions and flyers that travel a lot.

The Uniq single skin series consists of three different models. Each model is intuitive, easy to fly and delivers instant power even in the lightest breeze. They are stable and reliable without the weight of the extra skin. Yet the first and foremost advantage of the Uniq kites is that they are practically indestructible. Besides they pack compactly and weigh a lot less than conventional foil kites; not only because they are made with less material, but also because they are 40-60% more powerful for the same size. Last but not least, Uniq kites do not collect any sand that may affect flying.

FOR MORE INFO, CHECK PETERLYNN.COM

# VAPOR

**4-line fixed bridle foil // High performance race kite**

**2.7m<sup>2</sup> 3.2m<sup>2</sup> 3.8m<sup>2</sup> 4.4m<sup>2</sup> 5.2m<sup>2</sup> 6.2m<sup>2</sup> 7.3m<sup>2</sup> 8.6m<sup>2</sup>**

**10.1m<sup>2</sup> 12.0m<sup>2</sup> 14.1m<sup>2</sup> 16.6m<sup>2</sup>**

The Vapor is the ultimate high performance fixed bridle kite. Built for top level kite buggy racing, it pushes the envelope in every aspect, from its flat out performance to its exceptional build quality. This new iteration of the world renowned Vapor is not only faster than its predecessor, it is also more stable, more reliable, it's agile and has better upwind performance.

The Vapor makes it easy to go fast, yet it offers a continuous challenge in perfecting your riding and will satisfy your appetite for speed every time you go out. You will be hard pressed to find a kite that matches the outstanding characteristics the Vapor has to offer.

The new Vapor is the culmination of over 4 years of intensive research and development work combined with countless test sessions with some of the most prominent riders in the world.

*“The Vapor is a fast kite straight out of the bag, but there is a definite learning curve to master its potential and push it to its limits.”*

- Superb upwind capabilities
- World leading race performance
- Unrivalled stability
- Exceptionally rigid wing
- Performance enhancing bridle
- Aerodynamic perfection
- Extremely high flying speed
- Premium construction

# REACTOR

4-line fixed bridle foil // Buggy freeride - Race

2.2m<sup>2</sup> 2.8m<sup>2</sup> 3.5m<sup>2</sup> 4.4m<sup>2</sup> 5.5m<sup>2</sup> 6.9m<sup>2</sup> 8.6m<sup>2</sup> 10.8m<sup>2</sup>

Feel the need for speed? Then the Reactor will blow your socks off! Since the release of the very first Reactor series, the goal has always been to offer racing potential while keeping the kite easy to use and inspire confidence.

In the new Reactor the very best of the first two Reactor generations comes together to produce this new kite; offering race winning performance and very easy handling.

The Reactor is stable, forgiving, light on the controls and has very low lift. This makes it the ideal kite for buggy pilots wanting to explore their limits and take their riding to the next level.

*“The Reactor is an intermediate to high level buggy-race and free-ride engine and its exclusive design ensures you can always ride the perfect line. Downwind, crosswind or upwind, the Reactor delivers.”*

Amazing upwind performance

Solid and predictable power

Quick and easy steering

Stable, forgiving and low lift

High-end construction

Extremely rigid wingshape

# HORNET

4-line fixed bridle foil // All-round powerkite

2.0m<sup>2</sup> 3.0m<sup>2</sup> 4.0m<sup>2</sup> 5.0m<sup>2</sup> 6.0m<sup>2</sup>

The Hornet is the perfect entry into a world of endless wind powered excitement. Are you looking to make your first miles in a buggy or on a board? Do you just want to be dragged along your local beach or field? The Hornet will provide you with a highly dependable and versatile entry-to-intermediate level traction kite.

Besides being the ultimate 4-line foil for static use, the Hornet will also prove its worth if you'd like to get going in a buggy or on a board, where having a stable kite helps you to get going with confidence.

*“The Peter Lynn Hornet is undoubtedly the best way to get into some serious powerkite flying”*

The perfect intermediate all-round powerkite

Smooth and predictable power delivery

Superb stability

Large windrange per size

Intuitive performance

Direct feedback

# VOLTAGE

4-line fixed bridle // Freestyle - Jumping

3.0m<sup>2</sup> 4.0m<sup>2</sup> 5.0m<sup>2</sup> 6.5m<sup>2</sup> 8.5m<sup>2</sup>

Few things get the adrenaline flowing like flying a high performance kite... And even more so if that kite has been built for maximum jumping potential. Send the Voltage for a jump and you'll know what we're talking about!

Designed with maximum boost, lift and airtime in mind, the Voltage lends itself perfectly for buggy and landboarding freestyle. Its got plenty of speed on tap and more than enough raw power to lift you and your buggy or board to new extremes. Do you think you're ready?

*“Make no mistake; the Voltage is not your average powerkite. To deliver its insane airtime potential, the Voltage is fast, very fast. The Voltage is purposely built to go bigger, harder and higher than the competition.”*

- Extreme lift & airtime
- Hardcore performance & huge amount of power
- High flying speed
- High-end construction
- Renowned Peter Lynn stability
- Large windrange per size

# TWISTER

4-line fixed bridle // Freeride - Jumping

3.0m<sup>2</sup> 4.0m<sup>2</sup> 5.5m<sup>2</sup> 7.5m<sup>2</sup>

The Twister has been designed to push its performance to new and unprecedented levels. Its design features a higher Aspect Ratio than its predecessors making it more challenging to fly. Its innovative construction results in improved handling, quicker turning and higher flying speed. These improvements add to the Twister's jumping potential while at the same time keeping it accessible to fly!

The Twisters flies easy in light winds so getting tuned in to the kites behaviour can be done safely and with confidence. Once you got the basics down, you can turn up the power by flying it in higher winds, where its awesome potential will truly start to shine.

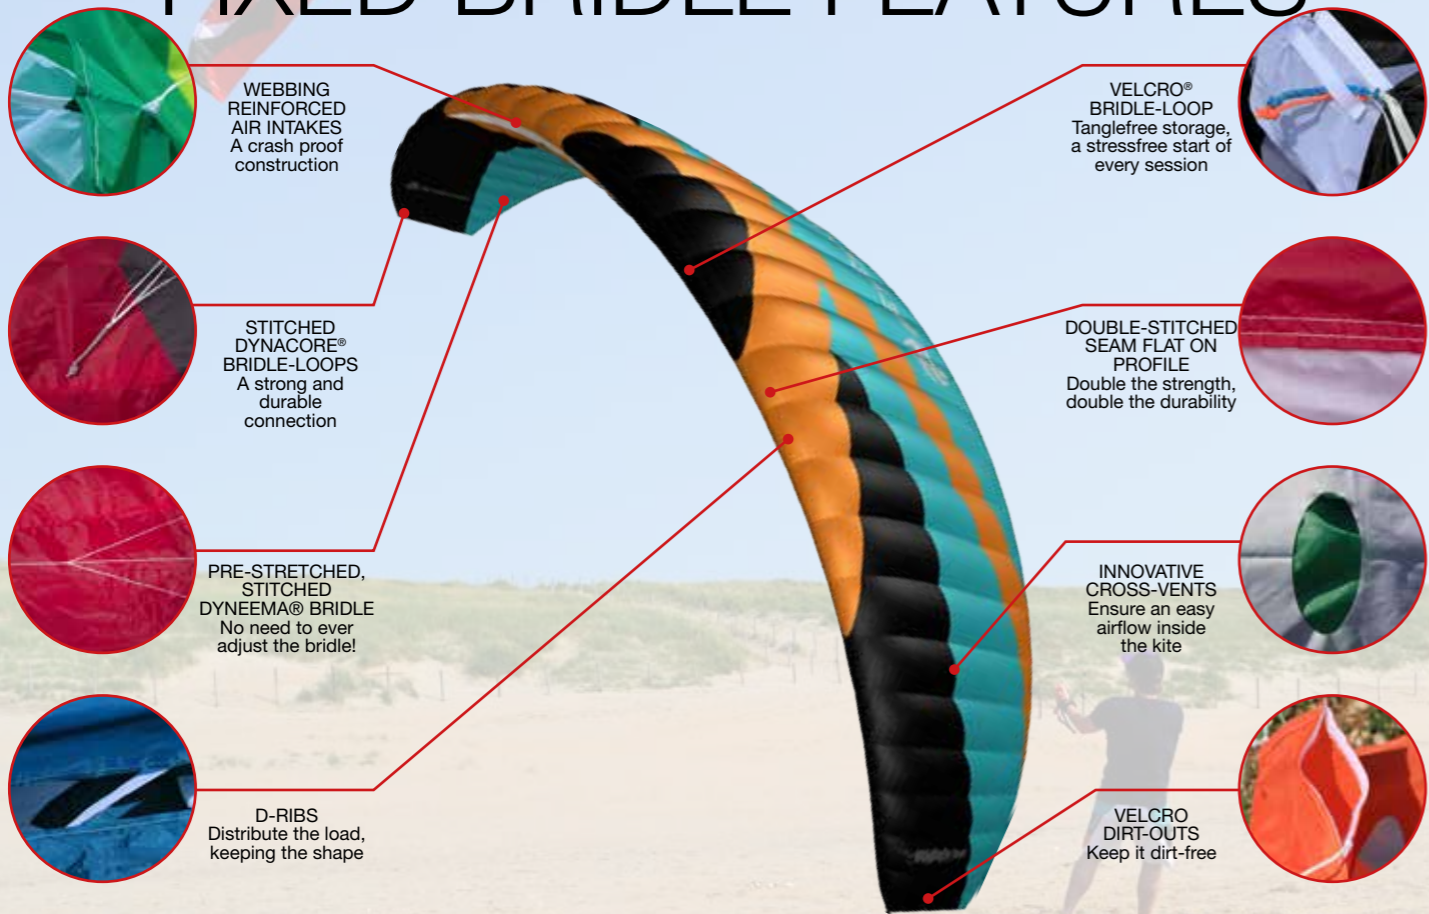

*“Besides being the ultimate 4-line foil for kite jumping, the Twister will also provide you with plenty of power to get going in a buggy or on a board.”*

- Impressive power for good lift & jumps
- Good lift & upwind performance
- Large wind range per size
- Smooth and predictable power delivery

# FIXED BRIDLE FEATURES

## HYPE

2-line fixed bridle foil with straps

Fun - Entry

1.3m 1.6m 1.9m 2.3m 2.6m

The Hype and Hype Trainer are the perfect kites for a day out with the whole family. They are incredibly easy to set-up and suitable for all ages and skill levels. Flying the Hype or Hype Trainer does not require any prior kiting experiences, as their docile flying behaviour ensures there are no sudden power surges when flying the kites through the wind window. Both the Hype and the Hype Trainer are similar in flight characteristics. The main difference is that the Hype is tuned to be flown on straps and the Hype Trainer is tuned to be flown on a bar. Both kites come with lines and straps/bar already attached to the kite for a hassle-free start of your kiting career. The Hype will surely inspire lots of kids to make a safe but serious start into tractionkite sports.

“While the Hype Trainer is a very friendly kite, it does have some power, especially in higher winds.”

## HYPE TRAINER

2-line fixed bridle foil with bar

Fun - Entry

1.6m 1.9m 2.3m

## IMPULSE TR

3-line fixed bridle foil with bar

Trainer Kite

1.5m<sup>2</sup> 2.0m<sup>2</sup> 3.0m<sup>2</sup>

This is your chance to develop your skills! The Impulse TR is the perfect 3-line trainer kite for anyone who wants to improve their flying skills before getting into any of the more extreme kite-powered board-sports. The Impulse TR is the perfect tool to introduce your kids, spouse, friends or family into the exciting world of traction-kiting.

“Designed as a trainer kite, the Impulse TR has been tuned to be extremely stable in all kinds of conditions.”

## ACCESSORIES

Peter Lynn offers a complete selection of accessories to enhance your kiting experience. Whether you are looking for specialized handles, the perfect harness or spreaderbar, you will find it on [www.peterlynn.com](http://www.peterlynn.com)

### RIDE THE ORIGINAL!

Mr Peter Lynn SR is the inventor of the kitebuggy and that is a fact that we are still proud of. More than 20 years later, we offer a range of buggies that deliver endless fun to the recreational rider at any level. The range consists of four different models, ranging from the original Competition ST, through the more robust Competition XR+ and the 'conquer all terrain' Bigfoot+.

COMPETITION ST

COMPETITION XR+

BIGFOOT+
