For more than 25 years, Invento is synonymous with imaginative leisure activities. Whether cool or classic - we bring fun and excitement to all ages. Worldwide, kites and wind spinners demonstrating the highest levels of innovative design and quality have been successfully sold under the trademark of „HQ“ (High Quality Design).

Our product ranges „power & control“, tech & build“ and „fun & sport“ are now anchored under the new „Invento Just Play“ brand and live up to our high quality standards. We complement our own product lines with a wide variety of further toys: Construction, creative, skill, games, and leisure items of well-known brands from around the world.

Our passion for products and different market places, innovation, high quality standards, a cooperative teamwork with our employees and customers and last but not least our environmental protection activities are among the challenges that keep us moving forward. Let us take you on a discovery trip through our exciting catalogues.

## The Invento B2B Web Shop: [www.invento-webshop.com](http://www.invento-webshop.com) Fast, practical and super easy!

Place your future orders quite comfortably in our web shop, which is exclusively addressed to retailers - work faster, easier and more convenient.

**Our B2B web shop offers you numerous advantages:**

- **Optimum of convenience:** Boot PC – log into the web shop – place your order!
- Web shop orders will be given **top priority – acceleration** of order processing!
- **Place orders at any time suitable for you – 24 hours a day, 7 days a week and 365 days a year!**
- Inventory information in real-time
- **Most recent information** regarding special offers, novelties, best-selling items and discontinued products
- Multimedia product information (e.g. videos)
- Search, select and order quickly
- Compose individual **shopping baskets and favourite lists** (time savings in follow-up orders)
- **Increased transparency:** Order history for current and completed orders, backorder information

## Register now and enjoy special advantages!

To access our web shop, you simply need your customer ID (account number) and password!

### 2 simple steps to request your password:

- 1) Please provide us with your shop email address:  
 Tel: +49 (0) 4402 9262-0 or  
 Fax: +49 (0) 4402 9262-29 or  
 Email: [service@invento-hq.com](mailto:service@invento-hq.com)
- 2) **After your email address has been stored**, click on the “Forget password/request” button on the screen. Enter your email address and zip code and we will send you the login password by email.

However, you can also request your password in person. We gladly will inform you about your password on the phone or by email.

If you are not yet our customer, we will be pleased to register you as a new customer.

**For security reasons, we recommend that you change your temporary password during your first order (password can only be changed when making a purchase).**

## Promotion Service

Our team can design a personalized message for many of our products. Your corporate logo or special message can be branded on the colours that you specify. Each request is handled personally by our sales representatives and coordinated with our in-house designers. We look forward to creating your personalised promotion. Call for your free private label catalogue.

## Mini Eddys & Creative Line

The "Creative Line" provides children with experiences that stimulate and encourage their natural creativity using colour and design. There is something wonderful about building your own kite decorated with your art work and watching it fly into the sky powered by wind and imagination. Our Creative Line kite kits give children the opportunity to enjoy the design and construction process on their own. Step by step, children create individual ideas for kite designs by using the enclosed materials. Ideal for a group activity at schools, parties, camps, workshops and family gatherings.

## Eddys

Our classic diamond kites are easy to assemble, easy to fly and come with beautiful graphics. All diamond kites come ready to fly including kite tail, handle and line.

## Delta Kites XL

Larger kites are more often easier to fly than small ones. This is especially true with our collection of XL Delta Kites, filling more sky for a great display as they also prove to be perfect flying machines.

They will also accommodate 'line laundry', windsocks and more tails for an even greater visual impact.

↪ Polyester 17 kp, 40 m on spool, incl.  
🏠 2,5-6 Bft. (14-49 km/h | 9-31 mph), 👤 8+

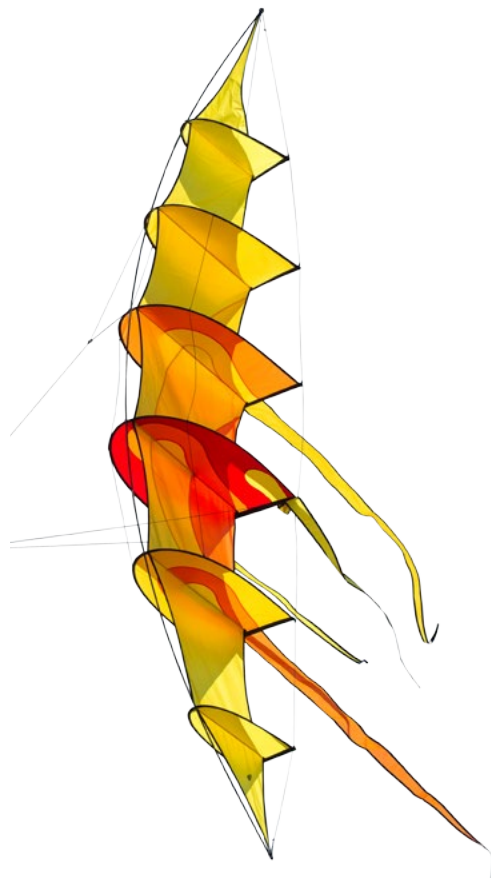

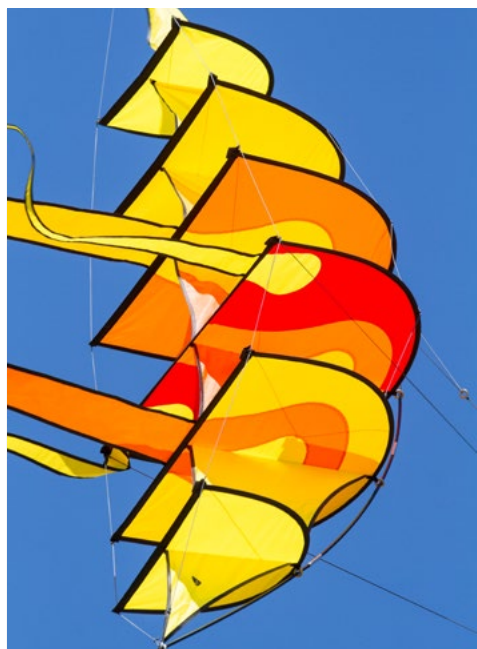

Our popular and regular sized Roto kite counts among the HQ "classics".

## Hoffmann Collection

Born in 1964, Rainer Hoffmann discovered his addiction to Kiteflying during 1986 in St. Peter Ording. After building his first "regular" kites he quickly proceeded with his own unique designs. He finished 1st place several times during the German Championships since 1997 and already published his own assembly manuals. All kites of Rainer Hoffmann truly convince through tremendous creativity and beautiful designs.

### Hoffmanns Bowkite "Sunrise" Art. Nr. 106387

↔ 55 cm, ↑ 300 cm, # Ripstop-Polyester,  
 ✂ 3 + 4 + 6 mm carbon + fiberglass,  
 ↪ Polyester 25-45 kp, rec.  
 🏴 2-4 Bft. (6-28 km/h | 4-24 mph), 👤 14+

A masterpiece designed by Rainer Hoffmann. Like a majestic sailing ship, this unusual kite stands tall in the sky, always moving slightly and quietly. The color and shape change depending on your angle of view. This is enhanced by the inclusion of a small tube tail. Weights are included for improved performance in higher winds. Now available in a new color combination of red & yellow.

Incl. 35 m kite tail.

### Hoffmanns Jumbo Tail Delta Art. Nr. 106895

↔ 300 cm, ↑ 150 cm,  
 # Ripstop-Polyester, ✂ 8 mm carbon,  
 ↪ Polyester 45-70 kp, rec.  
 🏴 2-5 Bft. (8-35 km/h | 5-22 mph), 👤 14+

The Jumbo Tail Delta is just what the name describes: Bigger, better, longer. With its 35 m kite tail this Delta is a reliable piece of art for kite enthusiasts.

**Hoffmanns Canard Delta**  
**Art. Nr. 106388**

↔ 295 cm, ↑ 165 cm, 📊 Ripstop-Polyester, 🪚 6 mm carbon,  
 🌀 Polyester 45-70 kp, rec. 🏠 1,5-4 Bft. (6-28 km/h | 4-18 mph),  
 👤 14+

With its impressive 9-meter-long tail, "Hoffmann's Canard Delta" makes for an impressive appearance in the sky. The canard sail, used in a Delta for the first time, gives "Hoffmann's Canard Delta" a smooth and balanced flight behaviour. This amazing single-line kite has a modified attachment of the flying line to the keel that allows a quick adjustment to changing wind conditions.

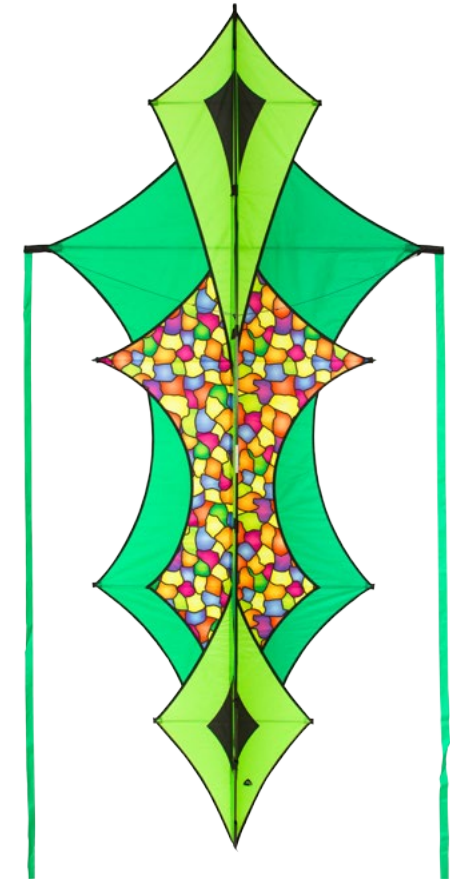

**Hoffmanns Sparkling Triangle Box**  
**Art. Nr. 106893**

↔ 150 cm, ↑ 120 cm, 📊 Ripstop-Polyester + Translucent Foil  
 🪚 6 mm carbon, 🌀 Polyester 25-45 kp, rec.  
 🏠 2,5-5 Bft. (10-38 km/h | 7-24 mph), 👤 14+

The Sparkling Triangle Box from Rainer Hoffmann is an unusual box kite with a breathtaking look. The combination of ripstop polyester and translucent sheeting creates cascading colors in the sunshine. Easy assembly ensures a quick launch for a colorful day of flight.

**Hoffmanns Xelon "Dazzling Colors"**  
**Art. Nr. 106876**

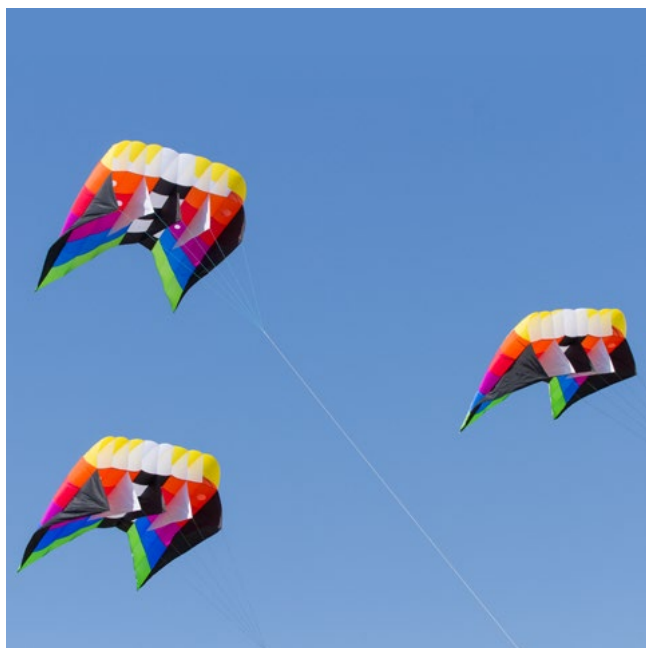

↔ 104 cm, ↑ 216 cm, 📊 Ripstop-Polyester,  
 🪚 4 + 6 mm carbon + fiberglass, 🌀 Polyester 25-45 kp, rec.  
 🏠 1.5-5 Bft. (7-38 km/h | 5-24 mph), 👤 14+

Hoffmanns Xelon "Dazzling Colors" is a winner in every respect: Outstanding in flight, a single spreader bar for quick assembly, striking graphics and a wide wind range. A suspended keel provides a perfect balance that allows the kite to glide when stalled.

## Flow Forms

Our Flow Forms are nearly unbreakable, require no assembly and offer a lot of fun. These elegant and extremely efficient kites are known as stable flyers in moderate to strong winds. The larger sizes can be used as "sky anchors" to lift larger line laundry or inflatable kites and need to be treated with considerable respect. They go up easy in a very wide wind range. These kites fold up quickly and are easy to transport. The storage bag that is included with the Flow Forms can be filled with sand and used as anchors.

Flow Forms generate enormous pull. For experienced pilots only. Strict observation of mentioned age and wind range is highly recommended.

**Flow Form 2.0**

## KAP Foils

Kite aerial photography (KAP) is photography generated by lifting a camera into the sky through use of a kite. The camera is triggered either remotely or automatically to take aerial shot and can be attached directly to the kite, but is usually secured to an adjustable rig suspended from the kite line. With this elevated view, pilots can capture landscapes, objects, architecture, and people in entirely new ways.

The beginning of KAP dates back to the late 19th century. Aerial photography from kites is, in fact, one of the oldest forms of remote sensing of the Earth's surface.

The KAP Foils developed by German kite enthusiast Ralf Beutnagel are reliable and very stable lifter kites for a camera rig. They have been used successfully since 2006 and have impressed many Kite Aerial Photographers by their flight characteristics. The wind range of the KAP Foil is fairly wide. These kites perform very well even in ground winds. Even KAP Foil 8.0 is more than sufficient to carry heavier cameras in light winds. In stronger winds, all KAP Foils fly very stable without slipping sideways.

**KAP Foils generate considerable pull.  
For experienced pilots only.  
Strict observation of mentioned age and  
wind range is highly recommended.**

Fringe tail included!

## Power Sleds

Our Power Sleds are nearly unbreakable, require no assembly and offer a lot of fun. These elegant and extremely efficient kites are known as stable flyers in moderate to strong winds. The larger sizes can be used as "sky anchors" to lift larger line laundry or inflatable kites and need to be treated with considerable respect. They go up easy in a very wide wind range. These kites fold up quickly and are easy to transport.

Power Sleds generate enormous pull. For experienced pilots only. Strict observation of mentioned age and wind range is highly recommended.

Rainbow fringe tail, incl. swivel.

**Generator 1 m**  
**Art. Nr. 108620**

ø 1 m

Colourful accessory to kite lines or poles. The Generator will delight the viewers and attracts a lot of attention. Available in rainbow.

**Tube Tail 20 m**  
**Art. Nr. 126425**

↑ 20 m, ø 15 cm

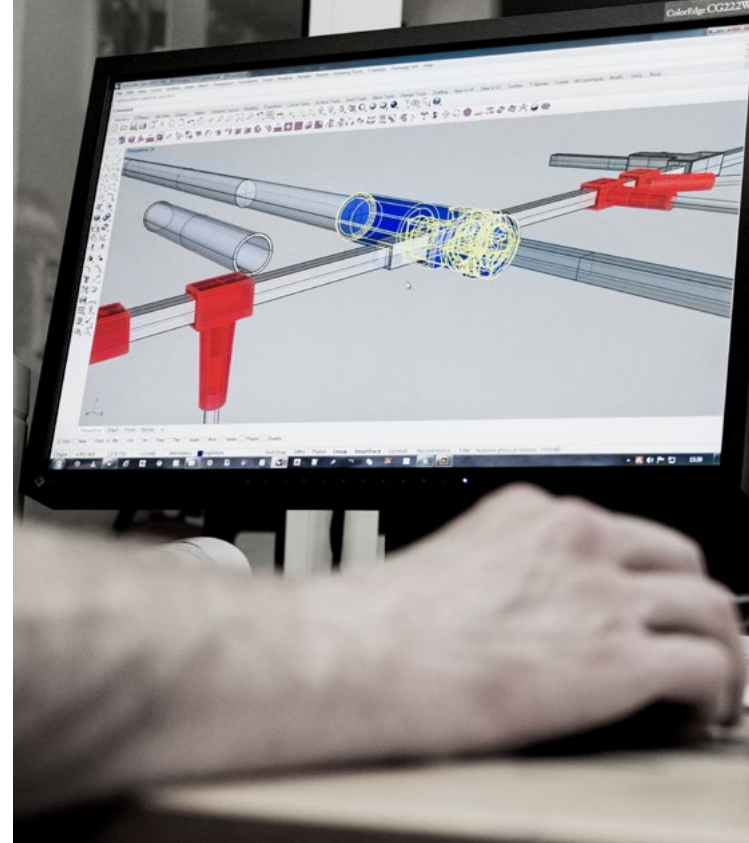

Tafetta tube tail that beautifies medium to large kites. Colour: Rainbow. Length: 20 m

**HQ SPORTKITES – 25 YEARS OF GLOBAL KITE COMPETENCE!**

With 25 years of experience in the development and production of innovative sport kites, the "HQ Sportkites" brand has a large community of fans worldwide.

Every year, we invest considerable funds in our development work. Our stunt kite models are developed at our site in Rastede/Germany by a highly motivated and competent team that uses lots of practical know-how in the design of new models.

We work according to strict quality standards. Our models are produced with high-quality space-age components and offer best performance and a fair price-performance ratio for dealers and end consumers in their respective classes.

**HIGH-TECH FABRIC FOR OUR KITE SAILS**

The decisive quality features for a high-quality kite fabric are light weight, tear-resistance and a resilient coating.

**Ripstop-Polyester and Nylon**

Ripstop means fabrics that have been woven with a special technique and that are particularly tear-proof. Grid-like reinforcement threads are integrated into the thin fabric at distances of 5 to 8 millimetres. Benefits of modern Ripstop fabrics are their extremely light structure, low wetness elongation and very high tear resistance.

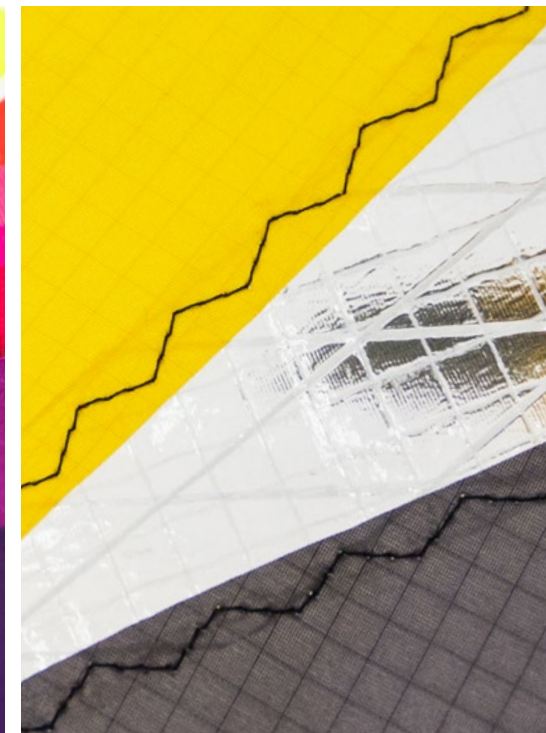

The most important fibre that is processed into Ripstop fabric is polyamide; the fabric produced with this is called Ripstop-Nylon.

Polyester fabric is also processed into Ripstop fabric. Polyester takes up only little moisture, is highly UV-resistant, maintains its shape even when wet and can be coated very well.

**Transparent Mylar-Laminate**

Mylar-laminate is a high-quality layered composite that is produced of several layers.

The core layer is made up of a highly resilient fibre fabric. The special benefit of Mylar is a high resilience and extreme form retention. Processing of Mylar film also gives any sail a particularly technical and high-quality look.

## FRAME OF SPACE AGE COMPOSITES

The frames of all "HQ Sportkites" are constructed solely of state-of-the-art composites that are used in aviation and aerospace as well.

### Carbon Fibre

Carbon fibres are a high-tech material that is particularly suitable for applications where a low weight is needed at a concurrent high stiffness. Carbon fibres are stiffer than steel, lighter than fibreglass and twist less easily. Kites with carbon frames therefore fly particularly precisely.

### Fiberglass

The strength properties of fibreglass fibres correspond to those of metals, but at a much lower weight. Fibreglass fibres are also extremely flexible and break-proof. We use fibreglass specifically in the construction of beginners' stunt kites. With their "crumple zone", fibreglass stunt kites will easily survive the feared crashes.

### Connection Technology

In the connection technology of "HQ Sportkites", we leave nothing to chance with our specifically constructed high-quality "HQ" connectors. Form and material resist the challenges of any wind, weather and temperature.

## A BIT OF LINE SCIENCE

Although the quality of the flight lines essentially influence flight performance and flying fun, quite a number of stunt kites are only equipped with moderate quality lines. "HQ Sportkites", however, contain only braided flight lines of high-quality fibres.

### Dyneema (Spectra) lines

Their extremely thin, light-weight fibres with very little stretch make Dyneema the ideal lines for stunt kites. At the same weight, Dyneema fibres are much more tension resilient than steel. The minimum elongation of the material (less than 5%) ensures maximum control of the kite, while the very small line cross-section minimises air resistance. The surface of our Dyneema lines is very smooth, so that they will not block or even "saw through" when turning in. The fibre is extremely resilient to abrasion, moisture, UV radiation and chemicals.

### Polyester

Polyester fibres are more cost-efficient than Dyneema. For "HQ" beginners' stunt kites in the entrance price ranges, refined, braided polyester lines are used. The natural elasticity of the fibres is drastically reduced by the pre-stretching of the lines. Polyester fibres also permit a small line cross-section with a reduced air resistance. The remaining extension after stretching deflects wind gusts better than Dyneema does.

### Twisted or braided lines?

In cheap "no-name" kites, low-quality lines are often used that will twist very quickly. "HQ Sportkites", in contrast, are equipped with high-quality closely braided line sets only to provide a trouble-free handling.

Dancer

CALYPSO<sub>2</sub>

BEGINNER

Beginners stuntkite, slow and easy to handle. Virtually unbreakable and a good choice for young pilots.  
Including 15 m tube tail.

Built from an almost unbreakable fiberglass frame and durable ripstop polyester, this docile entry level sport kite is extremely robust and fun to fly. Again and again

pilots mention the good-natured and predictable flying characteristics, which make the Calypso II one of the most popular beginner sport kites in the world.

Manufactured from durable ripstop polyester and almost unbreakable fiberglass rods, Quickstep II is noted primarily for its sturdy design. The setup is simple, the flying properties are extremely docile. Quickstep II can

be flown reliably even by beginners in a wide wind range. The drag forces are moderate, but solid – the flying speed doesn't overpower the pilot. With a little practice, the Quickstep II can master simple tricks.

ALLROUND

Yukon<sup>2</sup>

ALLROUND

Limbo II is truly a worthy successor to the well-known Limbo – more pull, more precision, sturdier, simple to assemble and the addition of bold graphite fabric accents. Despite the good-natured flight characteristics which make the Limbo II an excellent choice for beginners, this kite offers exceptional performance in

its class - pleasant design, precise and punchy flight, wide wind range. A frame of sturdy fiberglass renders the Limbo II extremely robust. No matter whether the winds are light or strong sea breezes are blowing – Limbo II is great fun even in difficult wind conditions.

The new "Yukon II" is ready to fly in the wake of its legendary predecessor. Faster, more precise and agile than the prior model, with a larger wind range and better response – the Yukon II makes learning to fly a sport kite a fun experience. With its flexible and robust

rods it is perfectly prepared even for hard landings. The "Yukon II" can perform a wide range of basic stunts (Axels, Slides, Pancakes and Backflips) so you'll never get bored.

The new Salsa III is superior to its predecessor in every respect – faster, more powerful, more precise and sturdier. With its new sail design Salsa III dances beautifully across the sky. Direct feedback makes

flight easier for novices. The frame is incredibly durable and provides for flight in a wide wind range - with tidy precision and tight loops. It masters even simple standard tricks easily. Let's dance!

Perfectly stable and forgiving for new pilots, the Jive III is a high performance sport kite you will never outgrow. Built with a tough and light weight carbon fiber frame, its wide wind range lets you fly where ever you are from coast to countryside. A Kevlar-reinforced nose and a Velcro spine release is designed to dissipate sail and

frame stress on extreme impacts. The Jive III's bridle is easily adjustable so that as skill level grows the kite can be tuned to be more radical and responsive. It also includes an optional counterweight that lets you change the balance point for advanced tricks.

ALLROUND

ALLROUND

The first thing you notice is the cool graphite fabric motif. But the Ion has far more to offer than eye-catching graphics. This all-rounder is extremely versatile and multi-talented - high quality, robust, wide wind range and equally suited to both gusty inland winds and strong coastal winds. Ion has good, precise trick kiting attributes and flies effortlessly

through modern trick sequences. Flic Flacs, Multi Lazys, Comets, Axel-Cascades, 540s - a dream, it's so easy. Strong winds? Fantastic ground passes or extreme loops will always give the pilot absolute controllability. The attributes of this kite make it well suited to beginners.

The Maestro III may look similar to its predecessor. But it is a completely redesigned sport kite that delivers the latest in trick flying performance. A rapid rotation of the Maestro III's longitudinal axis makes the completion of tricks easy and exceedingly precise. Equipped with a light and rigid frame made of carbon and Dynamic T15, this freestyle machine will allow you to explore all the possibilities of freestyle flight with

ease. Mylar panels give the Maestro III added stiffness and a distinguished look. Two removable 15 gram tail weights aid trick execution at stronger wind speeds. A moderate flying speed and predictable flying character make the Maestro III suitable for all skill levels. The versatility of this high-quality flying machine will never leave pilots bored.

# ZEBRA

The Zebra Kite is the result of a co-operation between HQ and trick enthusiast Helge Gosau. This freestyle kite impresses with clever detail solutions and amazing flight precision. The trick performance of the Zebra Kite is breathtaking. Ground tricks such as Ground Toss, Flap Jack and K2000 can be executed very well and in a way that is easily comprehensible. Side Slides and Stalls seem to be endless. The Zebra Kite dominates flat Axels and rotates as flat as a pancake through Slot Machines, 540s and Taz Machines. The kite fades like a dream – as long as you like and very stable. Backflip tricks are easily accessible, Jacob's Ladders, Multi Lazys, Comets and Flic-Flacs are no challenge at all. Although the Zebra Kite is not a pure competition kite, high-end tricks such as Yo-Fade and Crazy Copter succeed easily. Due to its neutral settings the Zebra Kite is aimed not

only at advanced users and trick experts, it also offers beginners a solid base for learning their first tricks. The wind range of the Zebra Kite is enormous and ranges from 6 - 35 km/h. The Zebra Kite is equipped with a 3-point bridle and a tension line which can be adjusted from slightly humming to whisper-quiet.

This exceptional high-end sport kite was developed by Andreas Koopmann. Competition-ready trick flight, coupled with very good precision. This kite is simple to handle. After only a short acclimatization, the pilot gets the feeling of being one with the Infinity kite. All known tricks are possible. The sideslides are endless, the basics elegant and majestic. Back and wrap

tricks are the speciality of the Infinity. Whether it is Backspins, Jacob's Ladder, Fade, Lazy Susans, Lateral Rolls or Yo-Yos: the Infinity executes all tricks with ease and high controllability. The combination of trick and precision is impressive. In a word, it is a dream kite for play and discovery.

TRICK & COMPETITION

LIGHT WIND

The Cirrus offers features that are otherwise only found in higher price brackets. Endless fun for beginners and experienced pilots is guaranteed with this exciting kite that combines quality with thrilling performance. Equipped with a light and rigid carbon frame, the Cirrus

offers excellent flying characteristics over a very wide wind range from 1-7 Beaufort. The Cirrus flies with a noticeable pull even during low wind conditions. In stronger wind this agile kite zooms through the sky at breath-taking speeds.

The Nimbus feels agile and fast, even in low winds. This flying machine follows an unswerving course through gusts or turbulence, providing responsive control that is appreciated by seasoned pilots and

beginners alike. Detailed workmanship and a rigid carbon frame guarantee excellent flying performance even above 4 Beaufort.

Stratus

This all-round kite combines state-of-the-art technological expertise to make light wind kite flying fun. The Stratus delivers outstanding light wind performance on calm days when other kites will not get off the ground. Even the slightest breeze of 2 mph is sufficient to fly this machine high into the sky. The Stratus masters

the latest freestyle acrobatics and most of the old and new tricks while ensuring a high level of precision – all at a down to earth price. The Stratus glides with the slightest breeze, but even higher winds above 13 mph will not throw this kite off track. With the Stratus, almost any day is a good day to fly.

Shadow

The Shadow resulted from the collaboration of our test pilots Ralf Naujoks and Ralph Joh. The goal was to create a light wind kite that had full freestyle abilities (mastery of all of the old and new tricks while ensuring a high level of precision), and attained the hovering properties of an UL kite. We think that the Shadow was extremely successful in meeting these goals. With the Shadow, pilots can be ready to work on tricks with even the slightest breeze on a quiet day. The light weight and elegant appearance of this kite take you away from the daily grind for a while. With an MP3 Player and the right music in your ear, flying the Shadow could become meditation. The construction of the Shadow is very light. It is a kite for advanced pilots and experts.

- Additional reinforcements on the stand-offs and spine
- Covered leading edge connectors: the flight line can slip through securely
- New type of adjustable HQ Jojo stoppers
- Additional catch leg on the bridle to prevent winding around the spine
- Light frame from 4mm carbon tubes and Dynamic T12 for a wide wind range
- Additional weight on the tail for rolling-up tricks and safe backspins

LIGHT WIND

"Stormy Pete" flies like it looks - quick and exciting. High speeds, tight spins and extreme manoeuvres are part of the repertoire. Built with flexible fibreglass rods, sturdy craftsmanship and a simple structure, "Stormy Pete" is ready to take on beginner pilots

and ferocious winds. Its precise control is amazing for a kite of its size and will help build confidence for neophytes at the controls.

The Stinger is an entry-level kite which combines a robust construction with quality workmanship. Its direct responses through the lines give pilots perfect control over the kite at all times. Nice loops and good precision will quickly lead to successful experiences. Still, the Stinger does not move in a slow and portly manner, but travels the skies in a rather dynamic way and over a wide wind range. The 6 mm fibreglass rods

will also survive unintended crashes. Stinger is an elegant and also excellent choice for beginners that will guarantee exciting flight experiences - all at a very affordable price.

Skill Beginner

# CRUISER

The Cruiser offers an exceptional introduction into the world of speed kiting. On account of its robust fiberglass rods and its top-quality manufacturing, the Cruiser will survive many crashes without impact on material and function. Take-off is relatively easy and as soon as the Cruiser is being propelled by the wind, the pilots ought to concentrate well. The Cruiser moves across the sky with great precision, both looping and in straight lines, wanting to be challenged. Anyone, who still has doubts,

should have a look at this kite. The acute design of its sail wastes no time in revealing the true character of this kite and those who enjoy battling with the wind, would make precisely the right choice with the Cruiser.

**Cruiser**  
Art. Nr. 116510

# BUZZ

The Buzz captivates through its appearance, ease and size. It appeals to ambitious beginners, who are looking for a predictable and affordable kite. Though it is also the right choice for more advanced pilots, who are not always looking for the wildest tricks and the highest speeds, but just wish to chill out during their leisure time. The Buzz is very forgiving in flight and its fiberglass rods make for a very robust frame. The shape of the Buzz and its sail with modern appearance make the kite look extraordinary attractive and highly elegant in the

sky. Buzz is a great kite for anyone, who is just looking for fun and relaxation. However, at higher wind speeds, power training will still be required, as the forces will then be quite considerable.

SPEED & POWER - INEXPENSIVE FIBERGLASS RANGE

# Delta Hawk

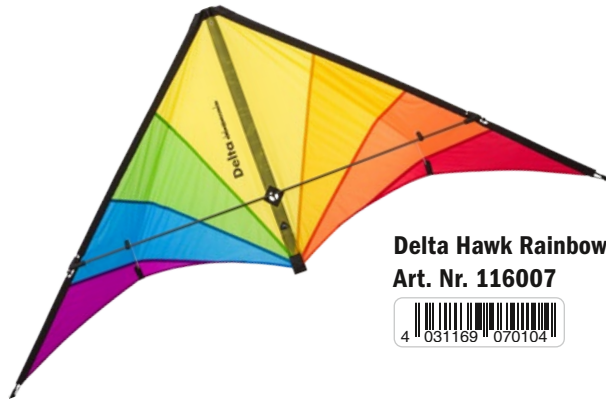

SPEED & POWER - DEMANDING CARBON RANGE

The Delta Hawk develops a very nice pull in higher wind conditions. Due to its 6 mm carbon tube frame this kite is more than robust and can be flown in very high winds.

The first impression of the Ninja would be one of a rather inconspicuous kite, but it packs a lot of punch. Pilots ought to have some experience when launching this kite and then take up fighting position. Extreme spins, sudden direction changes and a strong pull forward demand continuous concentration. Here, kiting is real sport with a good dose of fun. The carbon rods of the Ninja ensure precise and stable flights. When the trailing edge tensioning line is fully engaged, response will be

even more pronounced. Advanced and experienced pilots, who feel ready to engage in that fight, will not regret their choice.

Whizz is one of the fastest kites in the HQ range with the potential of becoming a cult classic. This kite's potential for fun is incredible. Its unique twin keel, high-end wind range, robust frame and speed in flight make Whizz stand out. Whizz starts flying at wind speeds of 2 Bft! Just watch it go! It stays steady on course in gusty inland winds. Screaming spins occur at speeds of 4 Bft and more. A flexible keel mounting

and cambered leading edge guarantee smooth acceleration for pleasant feedback. Yet Whizz is demanding and always requires your concentration in its quest for constant movement. You simply have to keep an eye on it.

**Whizz**  
Art. Nr. 117482

The Batkite is back! This silent rocket is a very precise and extremely controllable race kite. Even in gusty winds the Batkite develops its power smoothly and guides each pilot to the very limit.

SPEED & POWER - DEMANDING CARBON RANGE

Little Arrow flies fast, really fast. While flying Little Arrow pilots can go to the limits of their response capacity. Despite his incredible maneuverability, Little Arrow flies very precisely. Loops look like a moving circular saw blade and make Little Arrow a challenge for eyes and hands. The start succeeds easily at 2-3 Beaufort, from 4 Beaufort the challenge begins with the pilots' ability

to concentrate. In high winds, this little racer requires strong lines as Little Arrow develops surprising traction for its size. So this kite promises a fast-paced action experience for all pilots who want to push their limits.

Arrow is an extremely dynamic "real racer" that combines power and speed in an incredible manner to provide challenging flight experiences. Astonishingly tight wing tip loops and high speeds, even in lower wind conditions, guarantee sporty and endless fun. The Arrow takes off easily and runs on rails through the air, cutting cleanly through gusty winds and staying on course - those are properties not characteristic for kites in this

class. With medium to high wind conditions, pilots must be ready for a challenge. In addition, the appealing carbon design and broad, crescent-shape appearance help makes the Arrow a unique kite.

Single Line Mode

Dual Line Mode

## Multi Kite

The frameless Multi-Kite combines all the good things about kiting. The contemplative and relaxing side of single line kite flying and the sporty side of stunt kite flying. With this kite, both become so easy that we recommend the Multi-Kite for kids ages 10+. Flown as a single line kite, it develops light but noticeable pull. The long tube tail helps to stabilize its flying

characteristics. Simply take out part of the bridle line, attach flying straps and the Multi-Kite becomes a stunt kite. Perfect for beginners, the kite flies slowly which helps the first time flyer to perform loops, turns and dives with ease. The attached tube tail provides a colorful trail that follows the kites every move.

## HQ SYMPHONY - WORLDWIDE "TOP OF THE LINE"

For more than 20 years, the name "HQ Symphony" is a synonym for most successful foil kites worldwide. From generation to generation, all Symphonys have been adapted to the latest technological standards. With their current lines all "HQ Symphonys" belong to the "top of the line" foil kites in their classes. All "HQ Symphonys" guarantee first-class components, best workmanship and extreme durability. "HQ Symphony" offers a variety of lines for different target groups:

### Symphony Beach

- Designed to match the needs of beginners, provides excellent value for the money
- Symphony Beach belongs to the most successful and best-selling foil kites worldwide
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Provides excellent flight performance and decent accessories
- Compact carrying case - ideal for traveling and holidays

### Symphony Pro

- The Symphony line for demanding pilots - with uncompromising components and accessories
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Provides amazing flight performance and uncompromising accessories
- Sporty designs - stylish carrying cases
- Compact carrying case - ideal for traveling and holidays

### Symphony Speed

- The Symphony Line for advanced speed freaks and experts
- The Speed series lives up to its name with blazing fast speed
- Developed with paragliding know-how
- Provides amazing flight performance and uncompromising accessories
- Compact carrying case - ideal for traveling and holidays

The latest generation of the Symphony Pro series! Fun for all skill levels looking for speed and power, the revised Symphony Pro is one of our favorite kites. This ram-air, frameless foil design feels solid in the air and doesn't fold on the edge of the wind. Sewn Dyneema bridles provide low-drag and strength for performance that is fast, stable and smooth. The larger sizes have impressive pull, so be prepared to lean back and hold on. A compact carrying case makes it easy to take on your next adventure.

**HQ Kite Bag**

140 cm: **Art. Nr. 120205**

180 cm: **Art. Nr. 120200**

Robust and convenient kite bag that holds 10-15 sport kites. With extra inside pockets.

**HQ Kite Bag "ProLine"**

This new generation of HQ kite bags provide innovative design and a robust finish with a high degree of functionality. Thanks to the comfortable shoulder straps, these high-quality zipper bags can be carried like a backpack, if necessary. For demanding pilots these bags incorporate many clever details and inside pockets, offering plenty of room for kites and accessories.

## „Victorian Style“ Wind Spinners

The Victorian Era (1837-1901) was a period of transformation. In the decorative arts, this time did not produce merely one style, it produced many. Historical revivals, an anti-industrial return to nature, futurism, and Oriental exoticism all coexisted in the public imagination, and were often found in decorative combinations. Our Victorian style collection of wind spinners are reminders of this vibrant era and will add a splash of warm and inviting flair to your home. All items of this range captivate with a charming blend of style and colour.

## Spinning Balls & Personality Objects

Our Spinning Balls and Personality Objects are constructed with weatherproof and fade-resistant ripstop polyester. Let yourself be enchanted by the harmonious interplay between colour, light and wind.

## Windsock Kits

These cute little windsocks with funny animal characters dance happily in the wind on the included fiberglass handstick (60 cm, incl. cross lock swivel).

Including fiberglass handstick (60 cm) with cross lock swivel.

## Wind Turbines

Our Wind Turbines are beautiful classics. Install them on a pole and let the wind take them for a spin or add them in intervals to your single kite line as a custom expression of your playful side. Wherever you put them, they make smiles a breeze.
