For more than 25 years, Invento is synonymous with imaginative leisure activities. Whether cool or classic - we bring fun and excitement to all ages. Worldwide, kites and wind spinners demonstrating the highest levels of innovative design and quality have been successfully sold under the trademark of „HQ“ (High Quality Design).

Our product ranges „power & control“, tech & build“ and „fun & sport“ are now anchored under the new „Invento Just Play“ brand and live up to our high quality standards. We complement our own product lines with a wide variety of further toys: Construction, creative, skill, games, and leisure items of well-known brands from around the world.

Our passion for products and different market places, innovation, high quality standards, a cooperative teamwork with our employees and customers and last but not least our environmental protection activities are among the challenges that keep us moving forward. Let us take you on a discovery trip through our exciting catalogues.

WOODEN CITY

For more information, visit: www.invento-hq.com

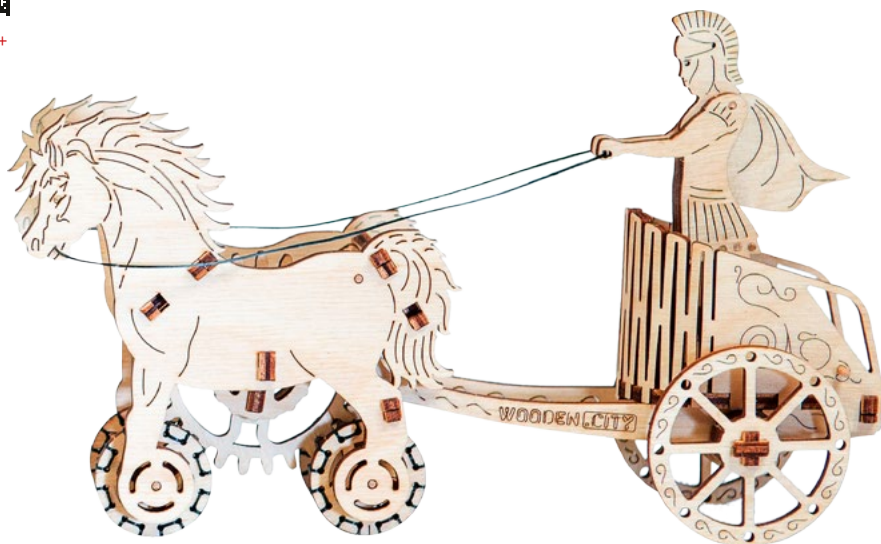

WOODEN CITY - THE UNIQUE WOODEN MECHANICAL MODELS:

- ▶ Natural materials – all 3D model kits made from sustainably sourced birch plywood
- ▶ Assembly of sets does not require any glue or tools
- ▶ Mechanical functions – all models produce motion (self-propulsion or other functions)
- ▶ Moving parts are sturdily constructed (e.g. stable and solid axes) and different from competitors
- ▶ Unique WOODEN CITY models provide a variety of functions and work without any electronic components
- ▶ Easy assembly – ready-to-assemble parts are laser-cut
- ▶ All sets come in attractive and unique packagings (wooden boxes)
- ▶ Made in European Union
- ▶ Unique designs make the WOODEN CITY models popular collection items
- ▶ All functional models are not children's toys
- ▶ Age: 14+

Roman Chariot

This WOODEN CITY 3D model kit is a copy of a war chariot employed and operated by Roman warriors in ancient times. Assemble this historically accurate model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the chariot with the trigger lever. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Roman Chariot is a perfect model for beginners. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 69

Assembly time: 2 hours

Model size: 22 x 5.5 x 13 cm

Packaging size: H17.5 x W24 x D2.8 cm

Art. Nr. 502322

Chariot Da Vinci

Da Vinci scythed chariot is an ancient war chariot with scythe blades mounted on each side. The blades extended horizontally to each side of the wheels. Theoretically the scythed chariot would plow through infantry lines cutting combatants in half or at least opening gaps in the line which could be exploited. This historically accurate WOODEN CITY 3D model kit with a rubber band engine was created to show you the amazing world of ancient mechanics. Assemble this historically accurate model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the chariot with the trigger lever. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Da Vinci Chariot is a perfect model for beginners. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Number of parts: 74

Assembly time: 2 hours

Model size: 23 x 10.7 x 10.4 cm

Packaging size: H17.5 x W24 x D2.8 cm

Kinetic Picture

What at first glance looks like a clock is in reality the model of a Kinetic Picture. Assemble this unusual moving picture with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Kinetic Picture with the trigger lever - the optical illusion will capture your imagination. Observe the whole rotation process when the Kinetic Picture triggers off the gears. Adjust the tightness of the rubber band and speed of rotation of the mechanism with the trigger lever. A hook is attached to hang the picture on a wall. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Kinetic Picture is a real fun for those who appreciate beauty and love science. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools
Number of parts: 185
Assembly time: 6 hours
Model size: 34.4 x 22.4 x 6.2 cm

Mechanical Picture

The world of illusions on your wall: the Mechanical Picture contains two disks rotating with different speeds. Assemble this unusual moving picture with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Mechanical Picture with the trigger lever - the optical illusion will capture your imagination. Observe the whole rotation process when the Mechanical Picture triggers off the gears. Adjust the tightness of the rubber band and speed of rotation of the mechanism with the trigger lever. A hook is attached to hang the picture on a wall. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Mechanical Picture is a real fun for those who appreciate beauty and love science. Age: 14+

Ferris Wheel

This WOODEN CITY 3D model kit of a Ferris Wheel is an original interpretation of the well-known amusement park attraction and a tribute to the engineers who realised our dreams to see the world from a bird's eye view. The Ferris Wheel model can boast nice bonus features – a secret casket and a small coin box. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Ferris Wheel with the trigger lever. The operating time is 2 minutes. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Ferris Wheel is a project of advanced level of difficulty. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Windmill

Green meadows, birds in the blue sky, and a windmill – windmills have shaped European landscapes for centuries. As soon as you open the wooden box this mechanical model will take your imagination. The Windmill model can boast a nice bonus feature – a small coin box at the bottom of the patterned stand. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Windmill with the trigger lever. Observe the whole rotation process when the Windmill triggers off the gears, among which there is a flywheel, and a real planet gear. On the left there is a trigger lever to stop movement of the Windmill. The operating time is 1 minute. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Windmill is a project of advanced level of difficulty. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

London Bus

Have you ever been to London before? Are you a 3D puzzle geek like us? Plunge into the vibrant London atmosphere by building our new WOODEN CITY 3D mechanical model – the famous London double-decker! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the London Bus. There are two trigger levers installed in this London Bus model to operate the speed level (speed control trigger) and the bus driving direction (direction control trigger). Listen to the engine sounds that we meticulously crafted in the manufacturing process to provide a more realistic driving experience. The London Bus rubber band engine operates in 2 speeds and is the most powerful on the market – the London Bus runs up to 4 meters. But that's not all! The London Bus has three passengers whose safety will be in your hands. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The London Bus will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools
Number of parts: 216
Assembly time: 6 hours

Jeep 4x4

Today the "Jeep" is a synonym for an expensive off-road vehicle. During WWII, the American company Willys started production of the Willys MB automobile. It went down in history as a reliable, manoeuvrable and functional vehicle. It was a "technical breakthrough". There was a real "war of engines". Overcoming of obstacles, road dust and risk – you have a real adventure in your hands! Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with the wooden key and start the Jeep. After assembly, you need to set the position of the lever forward or backward, set the locking lever in the stop position, start the model with the key and lower the lever (the key is located in the spare wheel). The front wheels are steered. Open and fix the hood by two locks and tilt the windshield. The Jeep can boast further exciting features – four-wheel drive transmission, independent suspension on both axles, internal combustion engine with moving pistons, 3 moving pedals (which are resiliently pressed with an additional rubber band), rear-view mirror, removable shovel, axe and canister. The Jeep runs up to 4 meters and is a real find for those who are fond of history and adventure. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Jeep will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Wooden mechanical 3D model: self-assembly requires no glue or tools

Biplane

Would you like to build your own airplane in less than 2 hours? Do you enjoy 3D wooden model kits as much as we do? Then go ahead with the WOODEN CITY Biplane model. Assemble this exciting model with ready-to-assemble laser-cut parts and the rubber band engine which is included in the box. Wind up the rubber motor with adjustable acceleration and start the Biplane – the Biplane runs up to 0.5 meters. Incl. detailed step-by-step instructions. The explanations of assembly stages are intuitive and easy to follow. The Biplane is an amazing gift for anyone with a passion for airplanes with geared engines. It will serve you for many years as an original interior decoration and a proof of your engineering skills. Age: 14+

Zpiiel[®]

For more information, visit: www.invento-hq.com

Zpiiel - the unique construction toy:

- ▶ Unique stand-alone toy system - one construction toy for all, everything fits together
- ▶ Easy to build - ready to play
- ▶ Allows to build unique characters
- ▶ Zpiiel Concept enhances kids play and creativity for action-packed role-playing
- ▶ Inflames childrens' passion for collecting different characters
- ▶ Highly flexible play system - amazing versatility due to different components and colours
- ▶ Play options and characters are endless: construct - play - reconstruct - play
- ▶ Zpiiel parts are 100% compatible with LEGO®
- ▶ Focus on quality - product development and production in Denmark
- ▶ Target group and age: 5-10 years, core target group are boys

► Zpiiel Construction Toys

The Zpiiel Makers are available in 3 different sets: 120, 270 and 600 parts. With 6 different Zpiiel parts children can build almost everything, from small to large models, e.g. figures, animals, buildings, flowers etc. The Zpiiel parts are available in different colours. Children can use the enclosed inspiration leaflet or just let their imagination take over to create their own Zpiiel models.

Star Coaster Level 2

The Star Coaster adventure starts here:

- Rail length: 10 m
- Number of parts: 193
- Assembled size: 60 x 18 x 36 cm
- Steel balls (incl.): 2
- Assembly time: 3 hours
- Instruction manual (incl.): English, German
- Battery (not incl.): 1 x C/LR14

Art. Nr. 501922

MOQ	CP	MC	
1	6	24	4 031169 206909

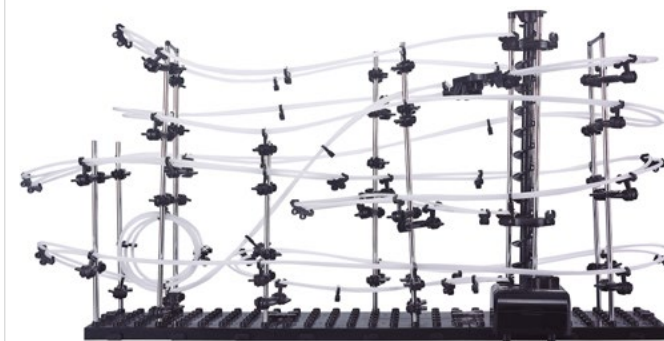

Star Coaster Glow in the Dark Level 2

Double the fun - this ball roller coaster glows in the dark:

- Rail length: 10 m
- Number of parts: 193
- Assembled size: 60 x 18 x 36 cm
- Steel balls (incl.): 2
- Assembly time: 3 hours
- Instruction manual (incl.): English, German
- Battery (not incl.): 1 x C/LR14

Art. Nr. 501930

MOQ	CP	MC	
1	6	24	4 031169 207708

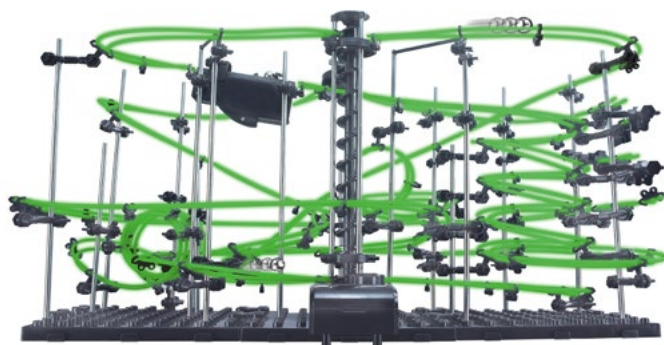

Star Coaster Level 3

Level 3 has more loops, but is still easy to assemble:

- Rail length: 16 m
- Number of parts: 343
- Assembled size: 71 x 20 x 36 cm
- Steel balls (incl.): 3
- Assembly time: 3 hours
- Instruction manual (incl.): English, German
- Battery (not incl.): 1 x C/LR14

Art. Nr. 501923

MOQ	CP	MC	
1	6	18	4 031169 207005

Star Coaster Glow in the Dark Level 4

Double the fun - this ball roller coaster glows in the dark:

- Rail length: 26 m
- Number of parts: 502
- Assembled size: 60 x 25 x 35 cm
- Steel balls (incl.): 4
- Assembly time: 8 hours
- Instruction manual (incl.): English, German
- Battery (not incl.): 1 x C/LR14

Art. Nr. 501931

MOQ	CP	MC	
1	3	12	4 031169 207807

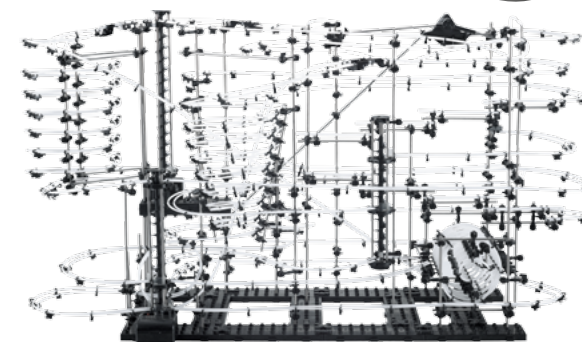

Star Coaster Level 5

A ball roller coaster with many stunts for advanced enthusiasts:

- Rail length: 32 m
- Number of parts: 682
- Assembled size: 95 x 34 x 41 cm
- Steel balls (incl.): 5
- Assembly time: 8 hours
- Instruction manual (incl.): English, German

Franzis Porsche Flat-Six Boxer Engine Construction Kit

Build your own classic Porsche 911 engine model and watch its operation through the transparent cylinders to learn how a flat 6 engine with its horizontally opposed cylinders works – model scale 1:4. The Porsche flat-six boxer engine and the cars it powers are legendary. With this kit, you can assemble a model of a 1966 2 litre flat-six engine in around three hours. Discover the fascinating world of automotive engineering with the whole family! Build a transparent engine replica using 290 parts. All essential engine parts move authentically: crankshaft, pistons, valves. No glue needed – all components are easy to assemble and screw together. A comprehensive manual provides plenty of information on and fun facts about Porsche and the 911. The development of the iconic design and the corresponding technical concepts are clearly explained. Awaken your inner engineer and get started! The detailed step-by-step instructions help you build your own Porsche flat-six boxer engine for your workshop, office desk or living room. The finished engine is mounted on a display stand and features a sound module with the original boxer sounds. Additionally required: 3 x 1.5V batteries (AA). Age: 14+

Franzis Jet Engine Construction Kit

Build a scale model of the engineering marvel that keeps Boeing, Airbus & Co. in the air. Experience a jet engine in action - with moving parts and sound - and discover its inner workings. Build a 63-piece replica jet engine with electric motor driven parts, electronic jet sounds and beautifully illustrated manual. All major engine parts move realistically. No glue needed - components screw together. Discover the inner workings of a jet engine - a masterpiece of engineering that has helped shape the world as we know it. Today, international and long distance travel would be unthinkable without this groundbreaking invention. With this kit you will assemble a moving scale model of a jet engine in around 2 hours. Discover the fascinating world or aeronautical engineering with the whole family. A comprehensive manual provides plenty of information and fun facts about jet engines and jet aircraft. The technical concepts and the history of development from the first jet engines to the high-performance turbines of today are described in vivid detail. The detailed step-by-step instructions help you build your own jet engine model for the workshop, office or living room. Additionally required: 3 x 1.5V batteries (AA). Age: 14+

Franzis Synthesizer Construction Kit

Do you remember Axel F., the Beverly Hills Cop soundtrack, A-Ha's Take on Me or the songs by the German band Kraftwerk? This retro modern, the mini keyboard of the 80s, allows you to revive the music in modern style. That's how to make music: Build your own synthesizer! Gilded touch keys serve as a keyboard for making music. With the completed synthesizer, you can generate classical sounds as well as futuristic music. Two push-buttons let you easily change between two octaves, tempered whole tones and semi-tones. Simply touch the keys with your finger to produce the desired notes. Use sound effects to craft your music individually. LEDs visualize the selected settings. Of course, the Franzis synthesizer also comes with a volume control. The kit comprises all required components. Even with low mechanical skills, you can build the synthesizer swiftly and easily. The detailed instructions describe the assembly step by step. Only a few components have to be soldered to the pre-assembled circuit board. Additionally required: Soldering iron, solder, wire cutter. To operate the device, 3 x 1.5 V batteries (AA) are required. Age: 14+

Franzis FM Radio Construction Kit (without soldering)

Build your own working FM radio without soldering! This great kit contains all the components you need to build your very own piece of retro cool - a modern style working FM radio! Includes full instructions in the shape of a manual. This complete kit (without soldering) contains all of the components you need: housing, loudspeakers, breadboard, receiver board with SMD assembly that includes an integrated TDA7088 VHF receiver, a speaker preamp, potentiometers and lots more. The package introduces and explains several circuit variants. High-quality components ensure clear FM reception and good volume. Reception range: 87.5 MHz to 108 MHz. Dimensions of the assembled radio: W190 x H135 x D25 mm. The perfect gift for 'build your own' fans of all things in a retro look! Additionally required: 1 x 9 V block battery (not included) for up to 50 hours of radio reception. Age: 14+

Art. Nr. 504162

NEW!

MOQ	CP	MC
1	1	60

Franzis Bat Detector Construction Kit

The Franzis Bat Detector kit lets you listen to nature with modern electronics. Human ears cannot hear the cries of bats because they use high frequency sound well beyond our hearing range. This is where the bat detector comes in. It electronically translates the bat's high frequencies (up to 100 kHz) to frequencies we can hear (20 Hz to 20 kHz). For ease of construction the kit contains a pre-assembled circuit board, you only have to solder a few elements yourself and wire up the microphone, loudspeaker and the controls. Due to modern integrated circuits, the detector will be very sensitive and powerful. Once the device is completed you can go out at dusk to see if you can find bats as they hunt using their ultrasonic echolocation. And because each species of bat uses a slightly different frequency and pattern you can try to identify them. This is a fun soldering project which opens up the fascinating world of bats. Bats are not the only source of ultrasound, there are also many technical devices which do, too. You will be surprised at the number of inaudible ultrasounds that surround us. Give your ears super powers. Frequency range: 20 kHz to 100 kHz. Additionally required: 9 V block battery (not included) for up to 25 hours of observation time. Age: 14+

Seasonal items: Available from October 2018!

Franzis FM Radio Advent Calendar

The Franzis FM Radio Advent Calendar is a must have gift for your favourite technophile at Christmas. The format is familiar but the contents are very different with a radio component behind each door. Each one has its own activity to demonstrate how it is used electronically and gradually the radio builds up until it is complete on Christmas Eve. But you are not kept waiting that long for the radio advent calendar to burst into life - it will start to receive FM radio signals on day 9. The remaining days add features and explore different circuit configurations for a complete understanding of the possibilities. Far from being beaten by DAB radio, FM transmissions are very much alive and well. This kit uses the latest digital signal processing technology to simplify the radio design while making it more versatile and with better reception. The enclosed radio template for cutting out allows you to mount the radio construction kit in a visually appealing retro housing used in the good old days. Additionally required: 2 x 1.5V batteries (AA). Age: 14+

Smart cars, stylish water crafts & speedy flyers!
The Invento "power & control" RC series makes the dream of flying and driving come true for everyone. All models impress with their smart design, innovative engineering, great extras, and a robust design.

RC Mini Racer

One of the smallest remote control speed racers in the world. Speedy like a weasel, this little pocket racer thrills young and old alike with its sportiness and offers clever features and outstanding value for money. 4 pylons included for your challenge. Headlights and tail light will be turned on when driving forward and backward. Recharge the car through the controller. Charging cable is well integrated inside the controller – easy and convenient! Long running times and short recharging periods for unlimited driving fun. Various models and colours randomly available.

- ▶ RC Mini Racer with adjustable directional stability, assorted colors
- ▶ Scale 1:63, Frequency: 27 + 40 MHz
- ▶ LED illumination while driving: 2 headlights, 1 rear light
- ▶ 2-channel remote controller with integrated charging cable & indicator
- ▶ 4 pylons
- ▶ Super-cool can packaging – perfect as a gift
- ▶ Multilingual manual included
- ▶ Operating time: approx. 5 minutes, Charging time: approx. 4 minutes
- ▶ Age: 8+

Recommended accessories: 2 x AA 1.5 V batteries (not included).

RC 4 Channel Quadcopter Micro 2.4 GHz

4 Channel "Ready to fly" Micro Quadcopter with 2.4 GHz technology. This technological stroke of genius, which is not bigger than a matchbox, flies extremely powerful and agile. Latest flight control system for ultra-stable and realistic indoor and outdoor flights in low winds. With some experience this amazing model allows more advanced maneuvers (loopings).

- ▶ 4 channel micro quadcopter (2.4 GHz) with built-in Gyro
- ▶ Latest flight control system: extremely steady and agile flight performance
- ▶ Suitable for both indoor and outdoor flying (in low winds)
- ▶ Suitable for aerobatics (loopings)
- ▶ Blue and red LEDs allows night time flying and better flight control
- ▶ Transmitter is designed with a LCD display
- ▶ 4 different flight modes - (40/60/80/100%) - beginner to professional
- ▶ Light ON/OFF function
- ▶ 4 channel controller: up & down (Pitch) - left & right (Yaw) - forward & backward (Nick) - sideways left & right (Roll)
- ▶ Overall length: 45 mm, Height: 20 mm
- ▶ Weight: 12g (without battery pack)
- ▶ Flying time: approx. 5 minutes. Charging time: max. 45 minutes
- ▶ Age: 14+

Contents: 4 channel micro quadcopter, 4 channel 2.4 GHz remote controller, flight battery pack LiPo 3,7 V 100 mAh, spare rotor blades (4 pcs), USB charging cable, instruction manual.
Recommended accessories: 6 x AA batteries 1.5 V (not included).

RC 4 Channel Quadcopter Mini 2.4 GHz

4 Channel "Ready to fly" Mini Quadcopter with 2.4 GHz technology: small but extremely powerful and agile. Latest 6-axis flight control system for ultra-stable indoor and outdoor flights. This amazing model is fully suitable for aerobatics and provides a transparent fuselage with blue and red LEDs for night time flying and better flight control.

- ▶ 4 channel mini quadcopter (2.4 GHz) with built-in Gyro
- ▶ High performance quad rotor design (2 x red, 2 x blue)
- ▶ Latest 6-axis flight control system: extremely steady and agile flight performance
- ▶ Suitable for both indoor and outdoor flying
- ▶ Suitable for aerobatics (loopings, 360° turns)
- ▶ Fuselage with blue and red LEDs allows night time flying and better flight control
- ▶ Transmitter is designed with a LCD display
- ▶ 4 channel controller: up & down (Pitch) - left & right (Yaw) - forward & backward (Nick) - sideways left & right (Roll)
- ▶ Flexible rotor blades, Rotor diameter: 55 mm
- ▶ Overall length: 117 mm, Height: 32 mm
- ▶ Weight: 24g (without battery pack)
- ▶ Flying time: approx. 7 minutes. Charging time: max. 50 minutes
- ▶ Age: 14+

Contents: 4 channel mini quadcopter, 4 channel 2.4 GHz remote controller, flight battery pack LiPo 3,7 V 250 mAh (2 pcs), spare rotor blades (4 pcs), dual LiPo charger, USB charging cable, instruction manual.
Recommended accessories: 6 x AA 1.5 V batteries (not included).

Sky Glider Blaze

Launched by the included rubber band catapult the Sky Glider soars and glides more than 30 meters (100 ft.). Wings can be adjusted for long gliding flights, spiralling, and even loopings. Soft rubber nose cone reduces risk of injury and damages of the Sky Glider. Start with: Rubber band catapult (incl.). Wingspan: 29 cm, Length: 24 cm, Sail: Ripstop-Polyester, Fuselage: Fiberglass, Age: 6+

Art. Nr. 111036

MOQ	CP	MC	
1	12	24	4 031169 168108

► Airglider

With wings made of extra strong rip-stop fabric and a fiberglass and carbon composite frame, our gliders are robust and more durable than conventional models. With their graceful lines and delicate aerobatic manoeuvres these gliders offer a feast for the eyes while they soar through the sky. Our Airglider offers the flyer many alternatives to experiment with the flight experience.

You are encouraged to add or subtract ballast and adjust the wings to alter the flight characteristics.

Airglider 40

Start with: Handstart, rubber band catapult (incl.).
Wingspan: 40 cm, Length: 45 cm, Sail: Ripstop-Polyester,
Fuselage: Carbon, Age: 6+

----------	----------	----------	-----------------

► Jazzminton – the exceptional Bachball Set

A special sound, a precise flight curve and the night play option are the special features of the new Jazzminton Set of Schildkröt Funspots. The bounce effect of the ball called “Birdie” provides a very special playing experience. The Birdies extra weight and rotation in itself allow a very stable and precise flight curve which makes Jazzminton the perfect game for relaxed fun for any age and skill level. You can play it as far as 1.5 m to 10 m apart, making it suitable to be played in any location indoor and outdoor, without net and field markings. Three different Birdies are provided: starters (red feathers – slow), experienced players (yellow feathers – fast) and the ball for night play (orange feathers). Whenever the ball bounces on the bat, the LED light in the base lightens up. The Jazzminton Set comes with two wooden rackets, which fit perfectly in the hand due to the comfortable soft rippled foam handle.

► Jabbit – the new toss & catch game

Jabbit is a toss & catch game from OGO Sport similar to „Lacrosse“. Jabbit consists of 2 „catchers“ and a matching Jabbit grid ball. The ball should be thrown with the catcher calmly and controlled to the play partner, who should catch the ball with the catcher, and play it back. OGO Jabbit is a beautiful challenge and big fun for young and old. Jabbit is training the eye-hand coordination as well as the motor skills for children and adults.

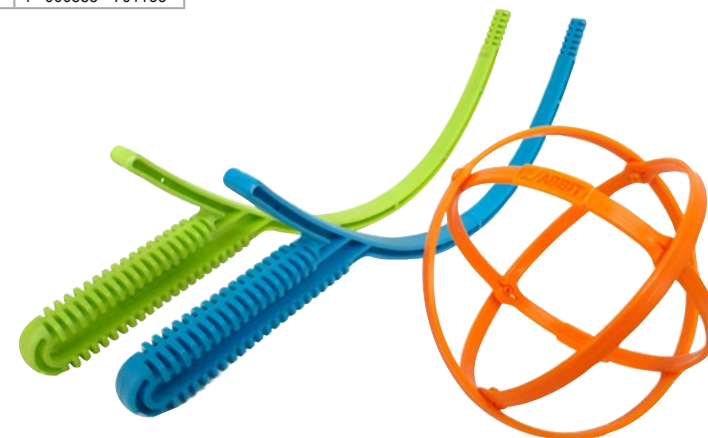

Ogo Sport® Classic Jabbit

The Classic Jabbit Set consists of 2 Jabbit „catchers“ (length 42 cm) made of clear varnished beech wood and a matching Jabbit grid ball of knotted rope (Ø 15 cm). The ball should be thrown with the catcher calmly and controlled to the play partner, who should catch the ball with the catcher, and play it back. OGO Jabbit is a beautiful challenge and big fun for young and old. Throwing distance for kids is about 3-5 meters, for adults up to 10 meters. Jabbit is training the eye-hand coordination as well as the motor skills for children and adults. Age: 6+

MOQ 1	CP 4	MC 4	4 000885 700114
----------	---------	---------	-----------------

► Schildkröt Funsport

The popular Schildkröt neoprene balls make a great impact with their soft textile surface, which produces significantly less skin irritation compared to other balls (e.g. for volleyball forearm passes or barefoot football matches). For children, the balls are particularly suitable due to their grip, which makes gripping and catching much easier. All neoprene balls are also good for playing in the water - they are even salt water resistant.

Schildkröt Beachball-Set XL

2 varnished wooden beachball rackets with colourful printing, black plastic handles (length 37.8 cm, width 23.5 cm, thickness 0.8 cm), 2 balls, in reclosable mesh bag with drawstring cord.
