## About Us

For about 35 years, Invento is synonymous with imaginative fun and leisure activities, for a liveable world, for young and old, indoors and outdoors. As an antipole to an increasingly hectic everyday life, people today are looking for leisure activities that focus on fun, relaxation and deceleration. Invento is prepared for these expectations and shapes the leisure time of young and old in many ways and with an exceptional product range. Kites, windspinners, toys - the Invento range includes exceptional, innovative and high-quality products that have a touch of something special. With our products, we improve people's well-being to better meet the ever-increasing challenges of everyday life.

### „HQ“ - Created For Fun, Engineered To Last:

With our „HQ“ umbrella brand, we hold a leading position worldwide in the markets for Kites and Windspinners. Due to high quality standards, good customer service, a versatile product range and the development of products by our own German team, Invento differs from its competitors and creates a lasting confidence in the performance of our products.

### Toys - „Invento just play“ and brands from all over the world:

Our own toy ranges under the umbrella brand „Invento just play“ stand for extraordinary playing experiences and high quality standards. With a passion for products beyond the ordinary, we complement our own product lines with a variety of well-known brands from all around the world. Let us take you on a discovery trip through our exciting catalogues.

## The Invento B2B Webshop: Fast, practical and super easy!

Place your future orders quite comfortably in our webshop on [www.invento-hq.com](http://www.invento-hq.com), which is exclusively addressed to retailers - work faster, easier and more convenient.

**Our B2B webshop offers you numerous advantages:**

- **Optimum of convenience:** Boot PC - log into the webshop - place your order!
- Web shop orders will be given **top priority** - acceleration of order processing!
- **Place orders at any time suitable for you** - 24 hours a day, 7 days a week and 365 days a year!
- Real-time inventory information on the product and in the shopping cart
- **Most recent information** regarding remainders, special offers, novelties and best-selling items
- Multimedia product information (e.g. videos)
- Download of product images
- Search, select and order quickly
- Compose individual **digital reminders** (time savings in follow-up orders)
- **Improved transparency:** Order history for ongoing and completed orders, information on outstanding balances, backorder overview, and invoice download
- Sales overview for current year and the two previous years
- Automatic notification for product restock by providing an email address

### Register now and enjoy special advantages!

To access our webshop, you simply need your email address and password!

**Easily activate your access to our B2B webshop in just a few steps:**

1. Visit our "Forgot Password" page. You can go directly to it via this link:  
<https://www.invento-hq.com/forgot-password.aspx>
2. In the next step, enter your email address.
3. The system will send a temporary login password to the specified email address.
4. After logging in, we recommend changing the password in your account view for security reasons (this is optional).

Alternatively, you can also request your password in person. We gladly will inform you about your password on the phone or by email.

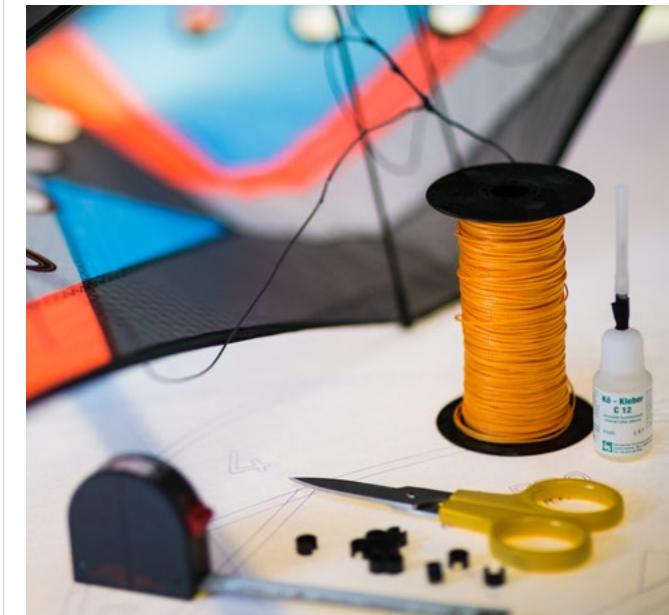

## Spare parts and repair service for HQ kites

With a kite from HQ, consumers rely on the highest quality in kite sports. Nevertheless, under harsh operating conditions, damage can occur or parts can be lost through inattentiveness.

For this reason, Invento offers dealers and end users a comprehensive spare parts and repair service if something breaks or the question arises whether a repair is worthwhile.

Should you have any questions with respect to spare parts or repair service, do not hesitate to contact us. Many spare parts can be ordered directly from the online store. We handle the shipping of replacement parts or the repair of an HQ kite by qualified specialists as quickly as possible.

Children's kites, bigger single-line kites or stunt kites from HQ - always the perfect choice.

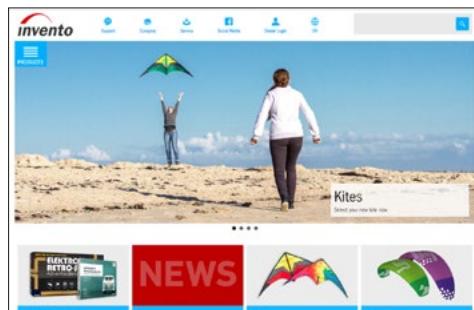

## Invento Customer Services + Nature Protection

For us, service means more than just the timely delivery of goods at a reasonable price. We offer our customers a variety of helpful services:

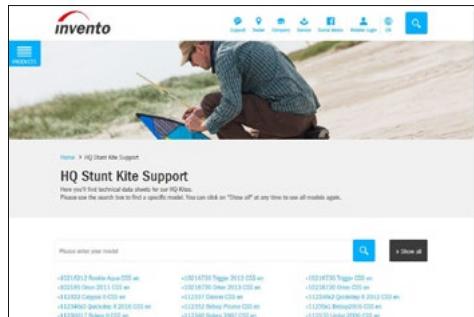

### Invento B2B Webshop

See catalogue page 4 for detailed information about the Invento B2B Webshop.

### HQ Sport Kite Support

In the support area of our B2B webshop on [www.invento-hq.com](http://www.invento-hq.com) you will find technical data sheets for many HQ Sport Kites.

### Product Availability

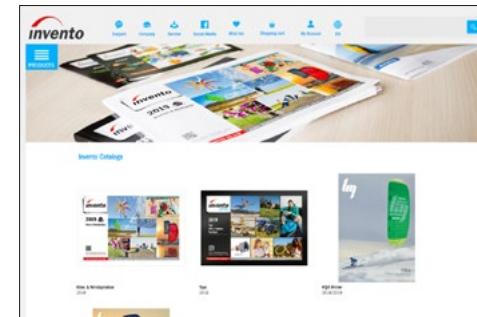

Current product availability information can be downloaded in PDF and CSV format. Please contact us if you are interested.

### Invento Newsletter

The Invento B2B newsletter is the ideal source of information for retailers who want to stay up to date. With our regularly published newsletter, you will receive exclusive insights into:

- the latest products and trends
- tailored offers and special promotions with exclusive terms
- upcoming product launches
- sales strategies and valuable tips to boost your sales
- Invento trade show dates and special trade show conditions

Stay informed and take advantage of our network to optimize your product range and maximize your sales. Sign up now and always stay ahead of the game!

### YouTube, Facebook And Instagram

In the service area of our B2B webshop on [www.invento-hq.com](http://www.invento-hq.com) you will find our download offerings for product and lifestyle images and many videos.

Make use of this free service and boost your own sales.

### Nature Conservation and Environmental Protection

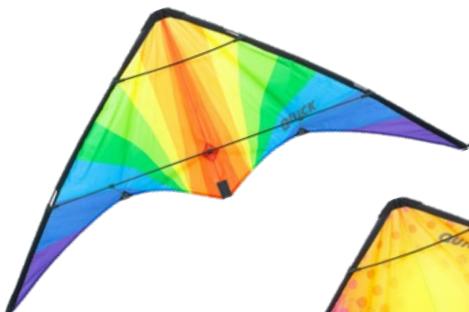

As a long-standing partner of NABU, we have been actively committed to species conservation for many years by creating natural habitats for animals on our company grounds and promoting biodiversity. Since 2012, we have been generating electricity with a photovoltaic system, which was expanded to 50 kWp after an energy audit. In 2024 alone, this initiative helped us save approximately 22 tons of CO2, significantly reducing our environmental impact.

Additionally, installed heat pumps contribute to further reducing the consumption of fossil fuels. Complementary measures, such as electronically controlled room thermostats and improved insulation, help us sustainably lower energy consumption and further reduce our ecological footprint.

## Ecoline: The Economical Kite Collection

Our Ecoline kite range provides excellent value for money. All kites are made of durable ripstop polyester.

## Parafoil Easy, Octopus

### Parafoils + Cylinder Kites

With no frames to break and an impressing fringe tail, our Parafoil Easy kites fly completely reliable in an extra-large wind window. These soft and safe kites require no further assembly and are perfect for travellers or an adventure filled trip to the neighborhood park. Parafoil Easy kites come ready to fly with line and spool in cool kite bags with striking graphics.

Our brightly coloured Octopus kites draw the attention of bystanders to their tentacles which gracefully float through the air. All Octopus kites come ready to fly with line and spool.

Our Cylinder kites are special in many ways and a perfect choice for inexperienced pilots – no assembly required, immediately ready to fly, and with reliable flight performance.

## Bird Kites

Our single-line bird kites combine high-quality materials and amazing flights with designs inspired from nature. Made from tear-resistant ripstop polyester and sturdy fiberglass, these bird kites guarantee a stable flying experience across a wide wind range. Each kite comes with flying line on a ring spool and once assembled, it's ready to fly. Whether at the beach, in the park, or in an open meadow – our bird kites provide hours of fun and captivate pilots aged 8 and up who are eager to conquer the skies.

## Brasington Collection

Robert Brasington is a renowned Australian kite maker and designer, known worldwide for his artistic kite creations. Since the early 1990s, Robert has channeled his passion for kite flying into the design of single-line kites that are not only technically impressive but also stand out for their artistic aesthetics. His kites are often characterized by geometric patterns, bold colours, and elegant forms that create a breathtaking visual experience in the sky. The masterful combination of creative designs and outstanding flight characteristics makes Robert's kites highly sought after by collectors around the globe.

Now available in a stunning new Aqua colourway, Hoffmann's Canard Delta elevates proven performance with refined style. Its sweeping 9-meter tail paints an unforgettable arc across the sky, while the innovative canard sail delivers remarkably smooth and balanced flight. A precision-tuned line attachment on the keel allows for effortless adjustment to shifting wind conditions. Where art and aerodynamics meet, the horizon becomes your canvas.

## Hoffmann Collection

Born in 1964, Rainer Hoffmann discovered his addiction to Kiteflying during 1986 in St. Peter Ording. After building his first "regular" kites he quickly proceeded with his own unique designs. He finished 1st place several times during the German Championships since 1997 and already published his own assembly manuals. All kites of Rainer Hoffmann truly convince through tremendous creativity and beautiful designs.

SINGLE LINE KITES

## KAP Foils

Kite aerial photography (KAP) is photography generated by lifting a camera into the sky through use of a kite. The camera is triggered either remotely or automatically to take aerial shot and can be attached directly to the kite, but is usually secured to an adjustable rig suspended from the kite line. With this elevated view, pilots can capture landscapes, objects, architecture, and people in entirely new ways. The beginning of KAP dates back to the late 19th century. Aerial photography from kites is, in fact, one of the oldest forms of remote sensing of the Earth's surface.

The KAP Foils developed by German kite enthusiast Ralf Beutnagel are reliable and very stable lifter kites for a camera rig. They have been used successfully since 2006 and have impressed many Kite Aerial Photographers by their flight characteristics. The wind range of the KAP Foil is fairly wide. These kites perform very well even in ground winds. Even KAP Foil 8.0 is more than sufficient to carry heavier cameras in light winds. In stronger winds, all KAP Foils fly very stable without slipping sideways.

KAP Foils generate considerable pull. For experienced pilots only. Strict observation of mentioned age and wind range is highly recommended.

The Hargrave Box Kite Rainbow Mesh by HQ is a contemporary tribute to the timeless Hargrave Box, originally designed by the renowned Australian inventor, Lawrence Hargrave, a visionary in the field of aviation. Hargrave's innovations greatly advanced our understanding of kites, serving as precursors to modern aircraft. HQ's interpretation of the Hargrave Box Kite delivers exceptional stability and balance when soaring through medium-strength winds, offering surprisingly robust lift. It's important to note that this kite is best suited for moderate conditions and should not be flown in storms or wind speeds exceeding 5 Beaufort (Bft).

**Red Baron 3D**

Art. Nr. 106015

Revised model -  
improved flying  
performance!

Looking for a day of fun with the family? Pick up our  
Red Baron 3D airplane kite and enjoy it flying. Red  
Baron 3D looks like a 3-dimensional airplane. Comes  
with spinning propeller and striking graphics!

## Line Laundry

No kite collection is complete without our variety of kite accessories and line laundry.

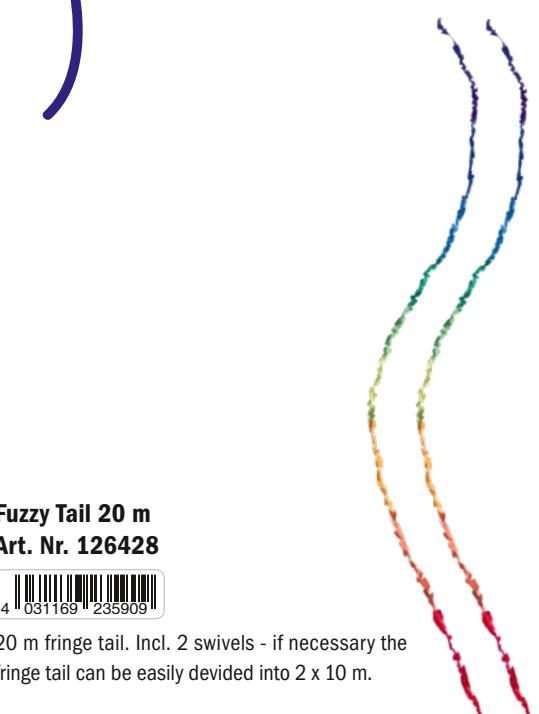

Colourful accessories for kites and lines are real eye catchers and attract a lot of attention.

**Fuzzy Tail 20 m**  
Art. Nr. 126428

20 m fringe tail. Incl. 2 swivels - if necessary the fringe tail can be easily divided into 2 x 10 m.

**Tube Tail 5 m**  
Art. Nr. 126415

5 m, ø 4.5 cm

**Tube Tail 10 m**  
Art. Nr. 126410

10 m, ø 15 cm

Very robust tube tail for line laundry and sport kites. Loops at the lower end of the tail can be opened for easy removal of sand. Available in rainbow. With metal clip.

**String Tail Rainbow**  
Art. Nr. 126300

6 m

Hang them on a line or attach them to a kite.

**Acro Tube Tail**  
Art. Nr. 122650

13 m, various colours

Hang them on a line or attach them to a kite.

**String Tail 4 m**  
(Set of 5)  
Art. Nr. 126421

4 m

Set of 5 string tails in different colours (red, yellow, green, blue, purple). Including EasyClip for easy "no knot" attachment.

**Generator 1 m**  
Art. Nr. 108620

ø 1 m

Colourful accessory to kite lines or poles.  
The Generator will delight the viewers and  
attracts a lot of attention. Available in rainbow.

**Fringe Tail 7 m**  
Art. Nr. 126430

↑ 7 m, ↔ 15 cm

Rainbow fringe tail, incl. swivel.

**Tube Tail 20 m**  
Art. Nr. 126425

↑ 20 m, ø 15 cm

Tafetta tube tail that beautifies medium  
to large kites. Colour: Rainbow.  
Length: 20 m

## HQ Tube Tails

Paint the sky with the HQ Tube Tails, the perfect complement for any kite. Take your flying experience to the next level. When attached to sport kites, loops, twirls, dives, circles, and figure eights will all be enhanced with this bright and bold show-stopping tail that traces your flight throughout the sky.

**Tube Tail Rainbow Spiral 6 m**

## HQ SPORTKITES – 35 YEARS OF GLOBAL KITE COMPETENCE!

With 35 years of experience in the development and production of innovative sport kites, the „HQ Sportkites“ brand has a large community of fans worldwide.

Every year, we invest considerable funds in our development work. Our stunt kite models are developed at our site in Rastede/Germany by a highly motivated and competent team that uses lots of practical know-how in the design of new models.

We work according to strict quality standards. Our models are produced with high-quality space-age components and offer best performance and a fair price-performance ratio for dealers and end consumers in their respective classes.

## HIGH-TECH FABRIC FOR OUR KITE SAILS

The decisive quality features for a high-quality kite fabric are light weight, tear-resistance and a resilient coating.

### Ripstop-Polyester and Nylon

Ripstop means fabrics that have been woven with a special technique and that are particularly tear-proof. Grid-like reinforcement threads are integrated into the thin fabric at distances of 5 to 8 millimetres. Benefits of modern Ripstop fabrics are their extremely light structure, low wetness elongation and very high tear resistance.

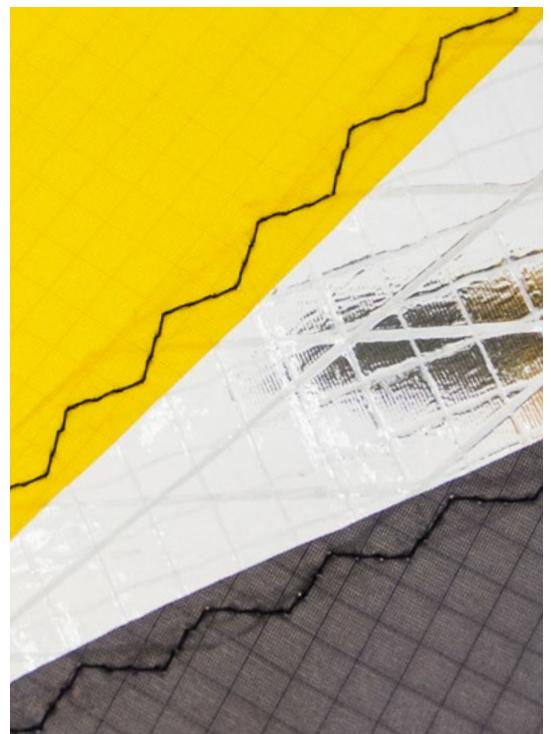

The most important fiber that is processed into Ripstop fabric is polyamide; the fabric produced with this is called Ripstop-Nylon.

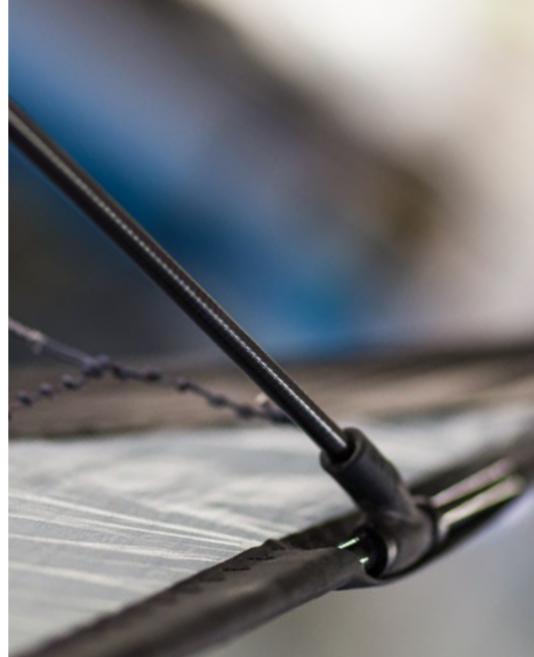

Polyester fabric is also processed into Ripstop fabric. Polyester takes up only little moisture, is highly UV-resistant, maintains its shape even when wet and can be coated very well.

### Transparent Mylar-Laminate

Mylar-laminate is a high-quality layered composite that is produced of several layers.

The core layer is made up of a highly resilient fiber fabric. The special benefit of Mylar is a high resilience and extreme form retention. Processing of Mylar film also gives any sail a particularly technical and high-quality look.

## FRAME OF SPACE AGE COMPOSITES

The frames of all "HQ Sportkites" are constructed solely of state-of-the-art composites that are used in aviation and aerospace as well.

### Carbon Fiber

Carbon fibers are a high-tech material that is particularly suitable for applications where a low weight is needed at a concurrent high stiffness. Carbon fibers are stiffer than steel, lighter than fiberglass and twist less easily. Kites with carbon frames therefore fly particularly precisely.

### Fiberglass

The strength properties of fiberglass fibers correspond to those of metals, but at a much lower weight. Fiberglass fibers are also extremely flexible and break-proof. We use fiberglass specifically in the construction of beginners' stunt kites. With their "crumple zone", fiberglass stunt kites will easily survive the feared crashes.

### Connection Technology

In the connection technology of "HQ Sportkites", we leave nothing to chance with our specifically constructed high-quality "HQ" connectors. Form and material resist the challenges of any wind, weather and temperature.

## A BIT OF LINE SCIENCE

Although the quality of the flight lines essentially influence flight performance and flying fun, quite a number of stunt kites are only equipped with moderate quality lines. "HQ Sportkites", however, contain only braided flight lines of high-quality fibers.

### Dyneema (Spectra) lines

Their extremely thin, light-weight fibers with very little stretch make Dyneema the ideal lines for stunt kites. At the same weight, Dyneema fibers are much more tension resilient than steel. The minimum elongation of the material (less than 5%) ensures maximum control of the kite, while the very small line cross-section minimises air resistance. The surface of our Dyneema lines is very smooth, so that they will not block or even "saw through" when turning in. The fiber is extremely resilient to abrasion, moisture, UV radiation and chemicals. Most "HQ Sportkites" are equipped with hi-tech lines from Liros / Hamburg. Top quality - made in Germany.

### Polyester

Polyester fibers are more cost-efficient than Dyneema. For "HQ" beginners' stunt kites in the entrance price ranges, refined, braided polyester lines are used. The natural elasticity of the fibers is drastically reduced by the pre-stretching of the lines. Polyester fibers also permit a small line cross-section with a reduced air resistance. The remaining extension after stretching deflects wind gusts better than Dyneema does.

### Twisted or braided lines?

In cheap "no-name" kites, low-quality lines are often used that will twist very quickly. "HQ Sportkites", in contrast, are equipped with high-quality closely braided line sets only to provide a trouble-free handling.

## BEGINNER

The diamond shape stands as a timeless favorite among beginner stunt kites. The Dancer Rainbow II features new, innovative connectors that make it a breeze to expand your kite fleet with stackable kites like the Dancer Rainbow II Expansion Kite (item no. 112339, available separately). This unique feature allows you to effortlessly launch multiple kites in succession, creating a captivating spectacle across a wide range of wind conditions. Whether you're a beginner or a seasoned pilot, the Dancer Rainbow II promises an exhilarating flying experience and promises hours of pure enjoyment. 15-meter tube tail included.

# QUICK STEP II

Manufactured from durable ripstop polyester and almost unbreakable fiberglass rods, Quickstep II is noted primarily for its sturdy design. The setup is simple, the flying properties are extremely docile. Quickstep II can

be flown reliably even by beginners in a wide wind range. The drag forces are moderate, but solid – the flying speed doesn't overpower the pilot. With a little practice, the Quickstep II can master simple tricks.

Quickstep and Bebop standoffs now integrate with sail to prevent accidental loss.

Limbo II is truly a worthy successor to the well-known Limbo – more pull, more precision, sturdier, simple to assemble and the addition of bold graphite fabric accents. Despite the good-natured flight characteristics which make the Limbo II an excellent choice for beginners, this kite offers exceptional

performance in its class -pleasant design, precise and punchy flight, wide wind range. A frame of sturdy fiberglass renders the Limbo II extremely robust. No matter whether the winds are light or strong sea breezes are blowing – Limbo II is great fun even in difficult wind conditions.

The Breeze is the next generation in the stunt kite segment and a worthy successor to the legendary Yukon. Specifically designed for beginners and intermediate pilots, it offers the perfect combination of speed, precision, and trick potential, making it an ideal training kite for pilots aged 12 and up. Thanks to its construction with fiberglass and hybrid rods, the Breeze

easily withstands rough landings. The Breeze provides exceptional flight stability over a wide wind range and in various wind conditions. Its precise flight performance and excellent feedback through low-stretch Dyneema lines make learning the basic tricks in Breeze's repertoire easy. Its compact size, thanks to the splitted leading edges, also makes the Breeze particularly transport-friendly.

**TRIXX**

The Trixx, the “little brother” of the Maestro, stands its ground as a versatile all-rounder with impressive trick capabilities. Its lightweight polyester sail, durable carbon frame, and modern aerodynamic design let it master all essential slack-line maneuvers. Whether you’re pushing your limits or looking for a responsive all-purpose kite, the Trixx is your perfect companion – perfect for newcomers to trick flying and experienced pilots alike. Smooth in the air and striking in appearance, it performs reliably across a wide wind range, staying controllable and agile even when the wind picks up. A truly exceptional flying experience you’ll enjoy.

**Maestro 4**

Maestro 4 – the next evolution in trick flying. The successor to the Maestro 3 sets new standards in freestyle kite performance. With its modern shape and lightweight 31 g polyester sail, it offers enhanced precision and control for demanding trick sequences. Both classic “Old School” moves and complex “New School” combinations are performed with impressive ease. High-quality materials such as carbon fiber and wrapped Dynamic rods ensure outstanding performance and durability. Its quick rotation enables precise tricks, while moderate speed and predictable flight behavior make it ideal for both beginners and advanced pilots.

The included 15 g weights allow easy fine-tuning for specific trick setups.

Flying sport kites is a craft of precision and rhythm – a sport where grace meets control. First made famous in the 80s and 90s, synchronized team flying is once again soaring in popularity, and the Fellow Ocean Strike is built for that stage. This updated edition brings a fresh new sail design to a proven performer known for its smooth, rail-like stability and exact handling. Whether carving crisp formations with fellow pilots or painting your own choreography across the sky, the Fellow delivers calm precision and fluid

control. It glides with poise, corners cleanly, and responds intuitively to every input. Capable of both relaxed flight and refined slack-line tricks, it's a kite that adapts to your mood – steady, balanced, and beautifully in command.

#### MANTRA

let your soul fly

Mantra - a kite for chilling, dreaming, tricking. Of course, the Mantra performs the modern tricks and moves masterfully, which it conjures up with a certain radicalism and elegance to the sky. The balance of the Mantra does not require a long settling-in period. Tricks are implemented with a high degree of precision

and traceability. The precision on long straights, in corners and loops is a real strength of this kite. The Mantra never overstrains its pilot, yet it offers a sheer untapped potential for developing its own flying abilities.

Introducing Diva, a remarkable sport kite that dominates the sky with its commanding size and exceptional flight capabilities. Its impressive appearance is perfectly matched by its performance. Diva effortlessly navigates through a wide range of wind conditions with dynamic precision, providing the pilot with consistent and gratifying feedback through the flying lines.

Whether executing tight loops, soaring in long straight flights, or performing elegant aerial maneuvers, Diva's size and agility captivate both pilots and onlookers alike. This kite is a versatile all-rounder, offering pilots the thrill of stunt kite flying combined with a

high level of enjoyment. Diva stands out not only for its remarkable performance but also for its aesthetic appeal, ensuring that pilots will be reluctant to stow it away after each flight.

"Stormy Pete" flies like it looks – quick and exciting. High speeds, tight spins and extreme manoeuvres are part of the repertoire. Built with flexible fibreglass rods, sturdy craftsmanship and a simple structure, "Stormy Pete" is ready to take on beginner pilots

and ferocious winds. Its precise control is amazing for a kite of its size and will help build confidence for neophytes at the controls.

## CRUISER

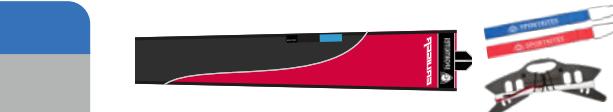

The Cruiser offers an exceptional introduction into the world of speed kiting. On account of its robust fiberglass rods and its top-quality manufacturing, the Cruiser will survive many crashes without impact on material and function. Take-off is relatively easy and as soon as the Cruiser is being propelled by the wind, the pilots ought to concentrate well. The Cruiser moves across the sky with great precision, both looping and in straight lines, wanting to be challenged. Anyone, who still has doubts,

should have a look at this kite. The acute design of its sail wastes no time in revealing the true character of this kite and those who enjoy battling with the wind, would make precisely the right choice with the Cruiser.

The Delta Hawk is a legendary classic among HQ sport kites. This robustly constructed speed kite shows its full strength especially in medium to strong winds. With its predictable flight behavior, the Delta Hawk

develops strong pulling forces in increasing wind and flies very fast. The Delta Hawk demands the highest concentration from its pilots.

**Delta Hawk Neon-Rainbow**

Little Arrow Sting, featuring a new sail design, flies fast, really fast. While flying Little Arrow Sting pilots can go to the limits of their response capacity. Despite his incredible maneuverability, Little Arrow Sting flies very precisely. Loops look like a moving circular saw blade and make Little Arrow Sting a challenge for eyes and hands. The start succeeds easily at 2-3 Beaufort, from 4 Beaufort the challenge begins with the pilots'

ability to concentrate. In high winds, this little racer requires strong lines as Little Arrow Sting develops surprising traction for its size. So this kite promises a fast-paced action experience for all pilots who want to push their limits.

The Arrow S Fireline takes HQ's renowned performance platform and ignites it with a bold new colourway that reflects its fierce, high-energy character. Demanding at launch but utterly thrilling once airborne, this precision sport kite slices through the sky with breathtaking pace and razor-sharp control. Every motion responds instantly – from tight, snapping spins to fluid, lightning-fast transitions across the wind window. The carbon-framed design remains technically

unchanged, preserving the refined balance and stability that expert pilots trust. Built for those who crave intensity and mastery, the Arrow S Fireline delivers pure adrenaline and absolute precision – a kite that rewards skill with exhilaration.

Arrow M Viper, featuring a new sail design that highlights its venomous character, combines high speed with manageable power. Pilots seeking these attributes will immediately take the Arrow M Viper into their hearts. Faster than Arrow L and Arrow XL, the Arrow M Viper provides impressive precision and a pleasant pull. Tight spins and razor-sharp ground

passes provide action and endless fun while flying. A sail made of bright green and graphite patterned polyester fabric with a sturdy carbon frame enable the Arrow M Viper to fly in a wide wind range.

Arrow L Inferno, featuring a new sail design, is an extremely dynamic "real racer" that combines power and speed in an incredible manner to provide challenging flight experiences. Astonishingly tight wing tip loops and high speeds, even in lower wind conditions, guarantee sporty and endless fun. The Arrow L Inferno takes off easily and runs on rails through the air, cutting cleanly through gusty winds and staying on course – those are

properties not characteristic for kites in this class. With medium to high wind conditions, pilots must be ready for a challenge. In addition, the appealing design and broad, crescent-shape appearance help make the Arrow L Inferno a unique kite.

The Arrow XL leaves no doubt about its purpose - pure power and a high degree of speed. Just like its smaller brother, the Arrow XL pulls dynamically and quickly on precise straights and extreme loops through the wind window. Even gusty winds do not strain the Arrow XL a

bit. Flying the Arrow XL is a very special experience and guarantees a fun workout. The size, shape and high-tech look underline the character of this kite, which belongs to experienced hands and requires the pilot's respect.

# Multi Kite

The frameless Multi-Kite combines all the good things about kiting. The contemplative and relaxing side of single line kite flying and the sporty side of stunt kite flying. With this kite, both become so easy that we recommend the Multi-Kite for kids ages 10+. Flown as a single line kite, it develops light but noticeable pull. The long tube tail helps to stabilize its flying.

Two flying modes in one kite!

## HQ SYMPHONY - WORLDWIDE "TOP OF THE LINE"

For more than 20 years, the name "HQ Symphony" is a synonym for most successful foil kites worldwide. From generation to generation, all Symphonys have been adapted to the latest technological standards. With their current lines all "HQ Symphonys" belong to the "top of the line" foil kites in their classes. All "HQ Symphonys" guarantee first-class components, best workmanship and extreme durability. "HQ Symphony" offers a variety of lines for different target groups:

### Symphony Beach

- Designed to match the needs of beginners, provides excellent value for the money
- Symphony Beach belongs to the most successful and best-selling foil kites worldwide
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Made from durable ripstop polyester for excellent flight performance in its class
- "Ready to Fly" accessories - includes flying lines and wrist straps on a winder
- Compact carrying case - ideal for traveling and holidays
- Includes a comprehensive sport kite guide with valuable flying tips

### Symphony Pro

- For demanding pilots who value premium materials and outstanding flight performance
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Made from lightweight ripstop nylon and low-stretch Dyneema bridle for outstanding flight performance even in light winds
- Premium "Ready to Fly" accessories - all sizes feature high-quality Dyneema flying lines and wrist straps on a winder
- For larger Symphony Pros (2.2 & 2.5): Convert to Quad!
- Sporty designs - stylish carrying cases
- Compact carrying case - ideal for traveling and holidays
- Includes a comprehensive sport kite guide with valuable flying tips

### Symphony Sport

- Perfect for beginners seeking a cost-effective and easy way to get started with control bar kite flying
- Developed with paragliding know-how
- Highly user-friendly - no foil kite in this class has fewer bridle attachment points
- Made from durable ripstop polyester for excellent flight performance in its class
- Comprehensive "Ready to Fly" package - includes flying lines on a sporty 2-line control bar, safety leash, and ground stake
- Stylish carrying case
- Includes a comprehensive sport kite guide with valuable flying tips

## SYMPHONY BEACH SPORT

2025 model - available only while stocks last!

The Symphony Beach III Sport with control bar combines dynamic flight performance with precise and easy handling. Its robust construction and stable flying characteristics make it the perfect choice for beginners and recreational pilots who enjoy speed, power, and control. The sporty 2-line control bar ensures a direct and responsive flying experience, adding an extra dose of excitement to every session. Compact, durable, and ready to fly - the Symphony Beach III Sport delivers pure fun in the sky.

## UPDATE

### Additional features of the Symphony Pro series:

- Convert to Quad – Our larger sized Symphony Pros (2.2 & 2.5) now have connecting points on the trailing edge so they can be easily converted into a quad line kite. Add a brake line bridle (sold separately) and enjoy true quad effect with reverse flying and active braking. Additional Quad Handles and flying lines are also sold separately.
- All Symphony Pro sizes come with new and improved kite bags.

Fun for all skill levels looking for speed and power, the revised Symphony Pro is one of our favorite kites. This ram-air, frameless foil design feels solid in the air and doesn't fold on the edge of the wind. Sewn Dyneema bridles provide low-drag and strength for performance that is fast, stable and smooth. The larger sizes have impressive pull, so be prepared to lean back and hold on. Compact carrying cases make it easy to take on your next adventure.

Convert to Quad - our larger sized Symphony Pros (2.2 & 2.5) now have connecting points on the trailing edge so they can be easily converted into a quad line kite. Add the brake line bridle and enjoy true quad effect with reverse flying and active braking.

**HQ4 Quad Handles XL „Coloured“**  
Art. Nr. 120533

Quad Handles made of heavy duty aluminium. The perfect accessory for the larger sized Symphony Pros (2.2 & 2.5) converted into a quad line kite.

JUMP – the name of this dual-line foil says it all. When the JUMP races towards zenith, its high aspect profile generates a lot of lift. This makes flying the JUMP a fun and physical challenge. Despite its sportiness, the JUMP is always manageable and never gets unstable. The first-class workmanship made of high-quality material and the elegantly designed carrying case make the JUMP a fun kite that can travel with you anywhere.

**JUMP 300**  
Art. Nr. 117674

**Control Bar 50 cm**  
Art. Nr. 120529

This control bar is the perfect accessory for Symphony Beach, Symphony Pro and other smaller 2-line kites.

# KICK 180

Scan QR code +  
watch video!

Unlike a conventional ram-air foil kite, the Kick 180 has been engineered without open cells. This robustly constructed 4-line single skin kite develops surprising, but always pleasant pulling forces. Due to its remarkably low weight, the Kick 180 performs in low wind speeds. With 4-line control, the Kick 180 is easy to launch, land and reverse launch, making it easy-to-fly and ideal for beginners. Designed and engineered with a minimal number of bridle lines, the setup and handling of this flexible wing is very user-friendly. The fear of a damaging crash is unfounded since the Kick 180 is virtually indestructible thanks to the single skin design – shattered cells belong to the past.

H Q 4 K I T E S

# BORN IN THE WIND

Here on the shores of the North Sea something is in the air. It strikes you with full force, a feeling of something calling, an invitation from the wind beckons you onward with a passion to strike out and take it all by storm – the beach and the sky.

Sandy dunes or wind-swept beaches – these terrains are now your playground to become one with nature's forces.

But this is only possible if you have reliable, robust sports gear that is reassuring and feels like a natural extension of your own body. We have developed and made that perfect kite equipment since 1997.

Deeply immersed in all the many facets of wind power and passionate about wind sports, we at HQ4 understand what it takes to create the perfect kite.

We do not settle for the generic status quo. We understand that complexity does not equal superiority – and that there is Elegance in Simplicity. Pinnacles of beauty, ingenuity and performance most often are the result of less of something – not more of it.

Here at HQ4, we are obsessed with making fun kites for people who are new to the sport or looking for something new to try. HQ4 has everything you need to get started. We want everyone to be able to share our obsession with kite sports. Your demands are our challenges. At HQ4 we design kites for you.

## \_TRAINER KITE **FLUXX**

**1.8**  
Art. Nr. 118023

Are you looking for an affordable kite to access the sport, but are not quite sure if you prefer kitesurfing or powerkiting, or simply want to have some fun? Use your Fluxx as a trainer kite and it will open up new sporting worlds for you.

### FACTS ////////////////

- Ready to fly and for immediate launch
- Easy handling - stable flight
- Automatic relaunch
- Robust material
- Easy access into powerkiting

Accessories (incl.): Cool kite bag, control bar 47 cm with dyneema lines, multilingual guide.

Accessories (opt.): Safety System (Hand Leash).

| SIZES      | FLAT SPAN (CM) | WIND RANGE (KNOTS) | LINE SET (INCL.)        | CONTROL OPTION (INCL.) |
|------------|----------------|--------------------|-------------------------|------------------------|
| <b>1.8</b> | 180            | 4 - 26             | Dyneema 100 kp 2 x 25 m | Control Bar 47 cm      |

## \_TRAINER KITE **RUSH PRO**

**350**  
Art. Nr. 118049

**300**  
Art. Nr. 118047

Are you looking for a kite that ticks all the boxes of a true traction kite? A kite that provides great pulling performance, ease of control and extreme durability? Then the Rush Pro trainer kite series has been developed just for you.

### FACTS ////////////////

- Robust cross-bracing rib structure
- 3rd-line for optimal safety and reliable reverse launch
- Ready to fly with flying lines attached
- Reduced bridle for minimal drag
- Good light wind abilities

Accessories (incl.): Cool kite bag, control bar 50 cm with dyneema lines, multilingual guide.

| SIZES      | FLAT SPAN (CM) | WIND RANGE (KNOTS) | LINE SET (INCL.)              | CONTROL OPTION (INCL.)   |

## \_TRAINER KITE HYDRA

**300**  
Art. Nr. 117575

Launch the Hydra and head off into the water! The Hydra is a unique trainer kite designed to re-launch in the water. The revolutionary closed-cell technology makes relaunching and landing on the water safe and easy. A one-way valve system and a watertight zipper effectively prevent water from entering the kite.

### FACTS ////////////////

- Reduced bridling for low drag performance
- Extremely robust cross-bracing rib structure
- Air intake system for quick self-inflation
- Superior aerodynamics
- 3rd-line for optimal safety and reliable reverse launch

Accessories (incl.): Cool kite bag, control bar 50 cm with coloured dyneema lines, multilingual guide.

| SIZES      | FLAT SPAN (CM) | WIND RANGE (KNOTS) | LINE SET (INCL.)        | CONTROL OPTION (INCL.)   |
|------------|----------------|--------------------|-------------------------|--------------------------|

## \_HANDLE KITE ALPHA

**1.5**  
Art. Nr. 118101

**3.5**  
Art. Nr. 118105

Are you looking for an uncomplicated beginner traction kite? We have developed the Alpha just for you - robust and forgivingly shaped design while maintaining very good power development. All materials were chosen for the tough conditions that a fun beginner kite has to withstand. In strong winds the kite will challenge you, but the quad line steering always keeps you in direct control.

### FACTS ////////////////

- Perfect for beginners
- Forgivingly shaped design for maximum safety and control
- Robust materials and workmanship
- Quad line steering
- Comprehensive R2F accessories

Accessories (incl.): Stylish backpack, quad handles, coloured dyneema line set, kite killer, ground stake for securing kite, multilingual guide.

**HQ4 2-Line Control Bar 50 cm**  
Art. Nr. 120529

Control Bar for Rush and smaller 2-line fun kites (e.g. Symphony).

**HQ4 3-Line Control Bar 50 cm**  
Art. Nr. 120528

Control Bar for 3-line kites (e.g. Rush Pro or Hydra).

The Beamer has been steadily perfected from one generation to the next and is now up for anything. The Beamer provides simple access to power kiting for beginners and provides skilled pilots with greater maneuverability, thanks to incorporated paragliding design know-how. With the Beamer you decide if you want to be radical and fast, or prefer to move with more ease - Beamer is extremely versatile.

**Surf Lock**  
Art. Nr. 119415

Never be locked out again! Surf Lock is the ultimate solution to outdoor key storage during outdoor activities. Surf Lock can be conveniently placed on your vehicle, outside of your home or business, for easy access without fear of theft! With its durable construction, you can be sure that your valuables are protected. Just enter your 4-digit combination, leave your keys and your worries behind!

**HQ4 Leashline**  
Art. Nr. 119423

This new HQ4 leash line sets new standards in kite safety. This is the first leash line to offer an individually adjustable release force that can be increased or decreased depending on the demands of the rider. Due to a completely transparent trigger mechanism, riders can rest assured that the system is set properly.

**HQ4 Strop Line**  
Art. Nr. 12053301

The HQ4 Strop Line features spliced loop ends that can be attached to any regular pair of quad handles. Heavy duty coating to protect the Dyneema line from wear. Easy and quick to attach or release. Length: 55 cm.

**HQ4 Ground Stake**  
Art. Nr. 120539

Ground stake for securing landed kites. In signal colour.

**HQ4 Harness Line Fix with Quick Release**  
Art. Nr. 119421

## HQ4 ACCESSORIES

**HQ4 Safety System (Hand Leash)**  
Art. Nr. 120527

This safety system for 2-line control bars (e.g. Fluxx) makes it possible to release the control bar in an emergency without loosing the kite.

**HQ4 Kite Killer**  
Art. Nr. 120538

## Winder Sets

Their extremely thin, light-weight fibres with very little stretch make Dyneema the ideal lines for stunt kites. The minimum elongation of the material (less than 5%) ensures maximum control of the kite. Dyneema is extremely resilient to abrasion, moisture, UV radiation and chemicals. Most "HQ Sportkites" are equipped with hi-tech Dyneema lines from Liros / Hamburg. Top quality - made in Germany.

## Breezy Wings

Each character in our Breezy Wings collection is equipped with a spinner featuring four realistic wings, creating a remarkably lifelike flapping effect in the wind. This distinctive design sets Breezy Wings apart from conventional ground spinners and lends every model a natural, dynamic presence. From graceful seagulls to vibrant parrots and delicate hummingbirds, Breezy Wings unite decorative elegance with captivating motion, making them a striking highlight in any garden or patio.

Art. Nr. 100703

↔ 51 cm, ↑ 95 cm

**"Victorian Style" Windspinners**

The Victorian Era (1837-1901) was a period of transformation. In the decorative arts, this time did not produce merely one style, it produced many. Historical revivals, an anti-industrial return to nature, futurism, and Oriental exoticism all coexisted in the public imagination, and were often found in decorative combinations. Our Victorian style collection of wind spinners are reminders of this vibrant era and will add a splash of warm and inviting flair to your home. All items of this range captivate with a charming blend of style and colour.

## **Kinetic Art Metal Wind Spinners**

Enjoy the kinetic movement of our metal wind spinners which combine modern functionality with graceful elegance. Featuring a solid metallic construction with dual motion, these durable wind spinners are provided with maintenance free sealed bearings and built to withstand all weather conditions. Solid ground stakes at the base ensure our metal wind spinners are firmly planted for windy days. Easy to assemble, these mesmerizing metal wind spinners are a wonderful addition to any garden.

**Art. Nr. 110275: blue**

**Art. Nr. 110276: yellow**

## Crystal Twist

Crystal Twist is a decorative highlight for both home and garden. A sparkling glass ball rests inside the refined steel spiral. As the spiral turns in the wind, a magical floating effect appears – as if the glass ball were suspended in mid-air. Includes nylon cord and stainless-steel hook. Also perfect as an accessory for our Kinetic Art hanging wind spinners.

## Promotion Service

Our team can design a personalized message for many of our products. Your corporate logo or special message can be branded on the colours that you specify. Each request is handled personally by our sales representatives and coordinated with our in-house designers. We look forward to creating your personalised promotion. Call for your free private label catalogue.
